

FREE Youth Programs

NewBridge inspires young minds through arts and technology based after-school programs

Do you picture yourself producing music? Capturing your world in photos? NewBridge offers FREE after-school programs for teens (9th – 12th graders) in a state of the art facility filled with the latest digital recording equipment, cameras, computers, and supplies. We provide fall, spring, and summer semester sessions. Note: summer sessions include eight graders going into the 9th grade.

- ▶ Classes are offered at no cost to students, with no hidden costs or materials to buy
- ▶ Bus passes are provided, making it easy for student transportation
- ▶ Semester courses provide opportunities for students to share work with professionals, the community, and world through exhibits and performances.

Ceramics

Are you good with your hands and enjoy making new things? Not all art hangs on the wall. Our ceramics studio exposes students to construction, and design through pottery. Make sculpture, bowls, and vases using different techniques ranging from hand building to slab construction to wheel throwing.

Digital Photography

Have you ever wanted to capture the world from your perspective? Learn to use digital cameras and professional equipment, lighting, and photo editing to capture images that express your ideas, thoughts, and feelings. Students are introduced to cutting-edge software as well as different styles of photography that allow them to capture structure, intention, impression, and an array of artistic themes.

Film/Video

Do you love movies? Have you ever thought about creating a movie? If so, Film/Video is the perfect class for you. Participants learn the skills and techniques associated with cinematography,

sound design, video editing, story boarding, and screenwriting. All students interested in film/video must complete at least one photography semester here at NewBridge before they are able to join our film/video class.

Graphic Design

Are you interested in learning a creative process that combines art and technology to communicate ideas? Learn how to draw on a computer, create web designs, edit video as well as learn how to create and use animation for marketing materials, and products. In addition, you will learn how to use Adobe Creative Suite, and other professional software programs.

Music Recording & Production (Music RnP)

Do you find yourself listening to music and thinking, "I want to learn how to do that?" In Music RnP, you will learn how to record, engineer, and produce music using industry-standard software as well as record, edit, and produce your own original music.

To sign up and join NewBridge's after-school program, visit www.newbridgecleveland.org or call (216)867-9775.
