

Name: _____ Class: _____

Write and solve a number sentence for each problem.

- 1** Sten buys 2 space stickers, 3 bird stickers, and 4 dog stickers.
How many stickers does Sten buy in all?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ stickers}$$

- 2** Stig has 3 cat stickers. He buys 6 more cat stickers. Then Klara gives him 2 cat stickers. How many cat stickers does Stig have now?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ stickers}$$

- 3** Klara counts her stickers. She has 4 dog stickers, 3 cat stickers, and 6 horse stickers. How many stickers does Klara have altogether?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ stickers}$$

- 4** Manu buys 5 horse stickers, 2 dog stickers, and 4 space stickers.
How many stickers does Manu buy in all?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ stickers}$$

- 5** Sten has 3 space stickers. He buys 4 more. Then Stig gives him 5 space stickers. How many space stickers does Sten have now?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ stickers}$$

- 6** Manu counts his stickers. He has 7 cat stickers, 1 horse sticker, and 2 dog stickers. How many stickers does Manu have altogether?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}} \text{ stickers}$$
