ABOUT OUR CAMP
AdvantageCLE offers a FREE eight-week camp each summer at Thurgood Marshall Recreation Center in Cleveland. Children receive breakfast and lunch and rotate through five components per day. Additional activities such as talent shows, poetry slams, and field trips are included.

OUR COMPONENTS
- Tennis + Fitness
- Literacy
- STEM
- Poetry Slam
- Wellness

**TENNIS + FITNESS**

The tennis curriculum teaches the basics of tennis to every age group, as well as allows for advancement in skill for those students familiar with the game. The curriculum explains the basics of tennis strategy, basic strokes, and scoring. We also incorporate movement and dynamic stretches in our fitness component. This summer, AdCLE will continue to offer intermediate and advanced tennis clinics for our competitive players.

**LITERACY**

The literacy component’s purpose is to allow students at every age group and level to improve their reading comprehension, writing, and vocabulary. It is our goal to assess students’ capabilities and help them reach their academic levels and encourage them to excel beyond. Providing hands-on activities such as theater, digital storytelling, and documentary workshops, we aim to give students a chance to boost their confidence and literacy skills.

**STEM**

From learning about our senses, to building bridges out of paper, to discovering the water cycle, students in all grades have fun with lessons and experiments that supplement and expand on the units being covered in school. This summer, we have many exciting new topics we will be exploring such as farming, manufacturing, robotics, and more.

**POETRY SLAM**

Whether it’s dancing, singing or reciting poetry – our students love to perform. Throughout the course of the summer, students learn about different forms of poetry and consistently practice writing and performing poems. We even have a poetry showcase at the end of camp so the campers can perform for an audience and develop their public speaking skills.

**WELLNESS**

The wellness curriculum seeks not only to stress the importance of physical fitness but also the importance of nutritional and emotional wellness as well. Students learn to take care of their bodies and their minds. The wellness staff seeks to emphasize goal setting, having a growth mindset, and regulating emotions.
