

Different Keys for Different Places

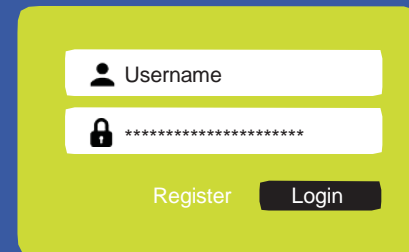

Using the same password for multiple sites opens the door to greater losses.

amazon.com®

A green login form for Amazon.com. It features a white input field for 'Username' with a person icon, a white input field for a password with a lock icon and asterisks, and two buttons: 'Register' and 'Login'.

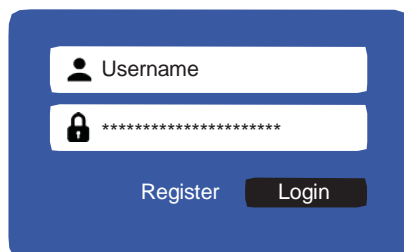

CMSSD

A yellow-green login form for CMSSD. It features a white input field for 'Username' with a person icon, a white input field for a password with a lock icon and asterisks, and two buttons: 'Register' and 'Login'.

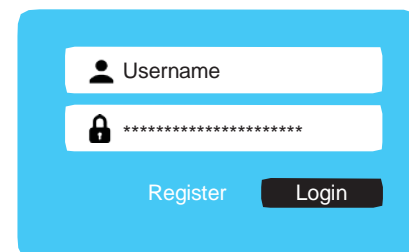

DIFFERENT
PASSWORD
FOR
DIFFERENT
PLACES

facebook

A blue login form for Facebook. It features a white input field for 'Username' with a person icon, a white input field for a password with a lock icon and asterisks, and two buttons: 'Register' and 'Login'.

twitter 

A light blue login form for Twitter. It features a white input field for 'Username' with a person icon, a white input field for a password with a lock icon and asterisks, and two buttons: 'Register' and 'Login'.

Use different passwords for different accounts, just as you use different keys for your car, home, and mailbox.

DON'T REUSE – use a unique password for every online account.
