BIGGER, BETTER PERIODIC TABLE!

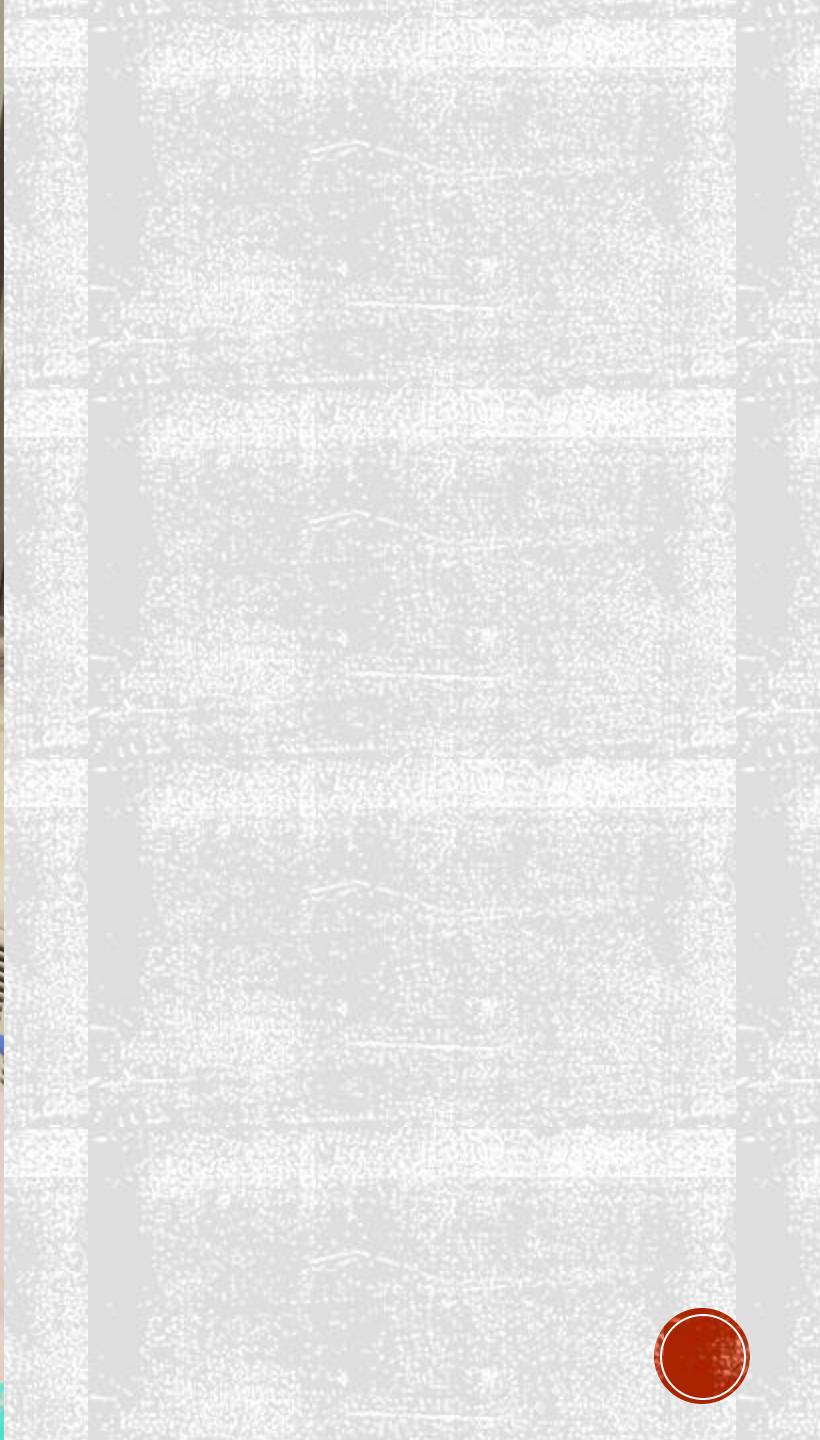

The periodic table is color-coded by groups and includes a key for element categories. It features the title 'BIGGER, BETTER PERIODIC TABLE!' and a brief explanation of the periodic table's structure.

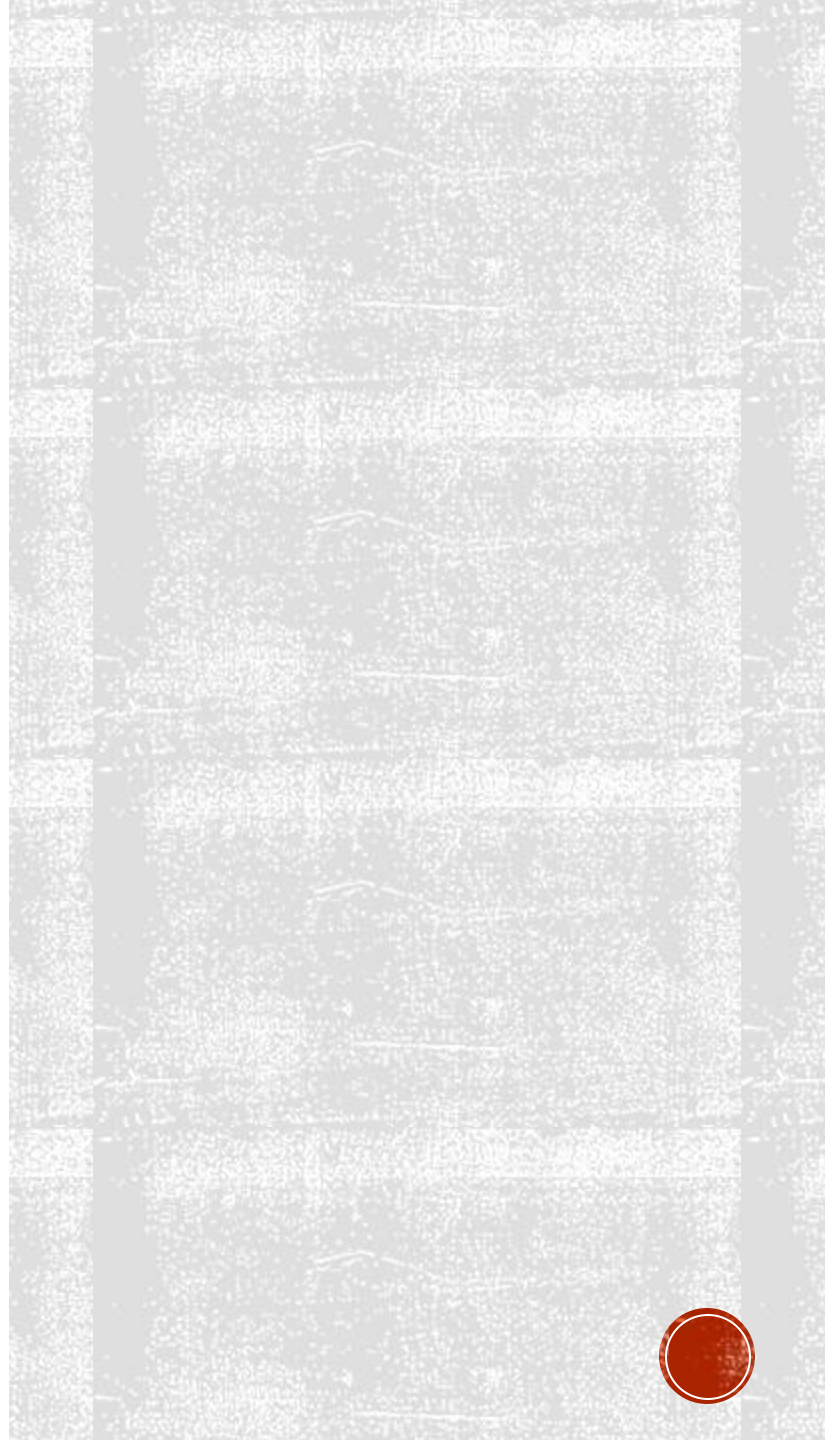

Chemistry: Basic Concepts of Matter

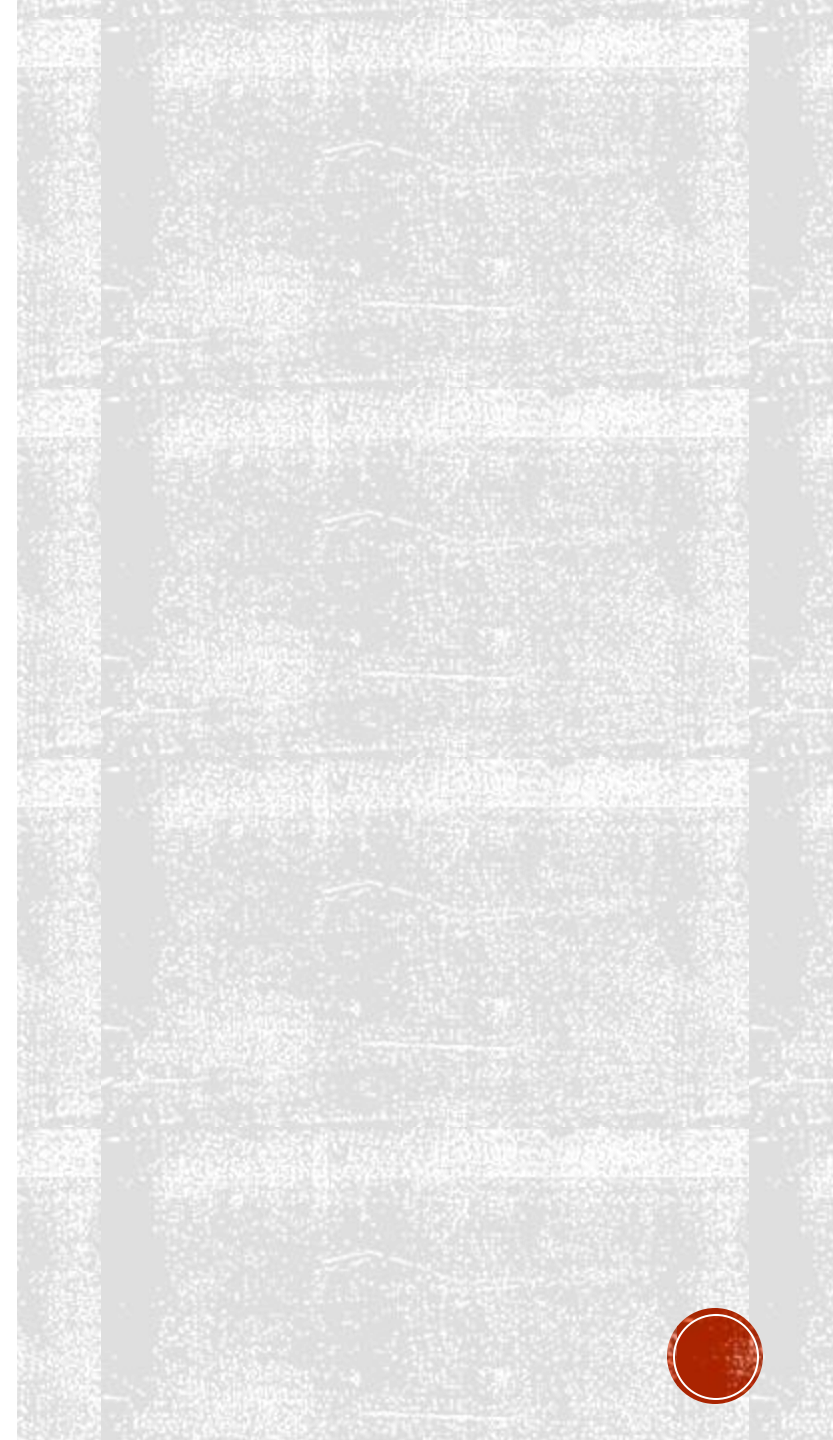

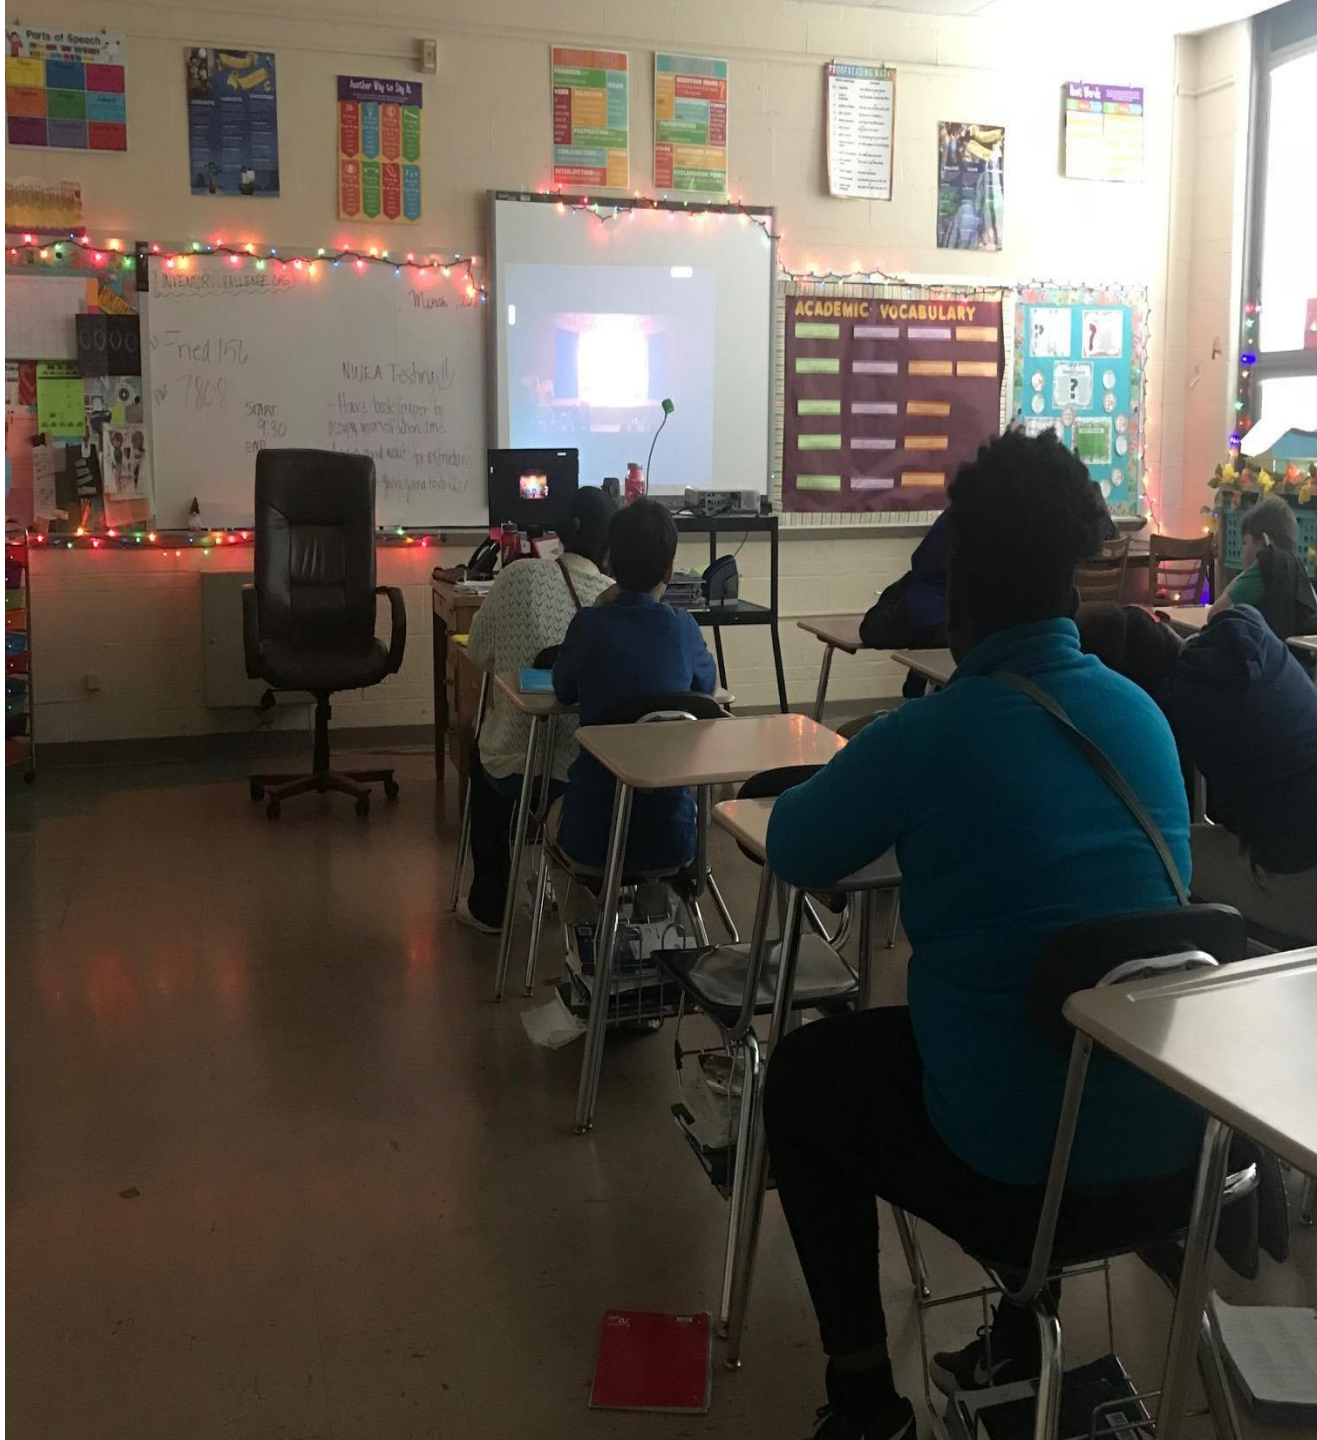

The diagram illustrates the relationship between Matter, Mass, and Weight. It also shows the structure of an atom with a nucleus and electrons. A section titled 'Avogadro's Number' states that 6.02 x 10²³ water molecules weigh 18.02 grams. Another section shows 'Specific Gravity' with a balance scale.

atomic # = # protons
atomic mass
