

CITYWIDE ANALYSIS

K-8 and High School Fact Base: Citywide

Spring 2019

The Citywide Analysis is organized around four key metrics

Academic Quality

- School report card grades
- Trend of student performance over the last three years

Enrollment and Choice

- Historical and forecast enrollment trends
- Attendance patterns across district, charter and private schools

Program Viability

- Financial sustainability of District schools based on enrollment thresholds¹

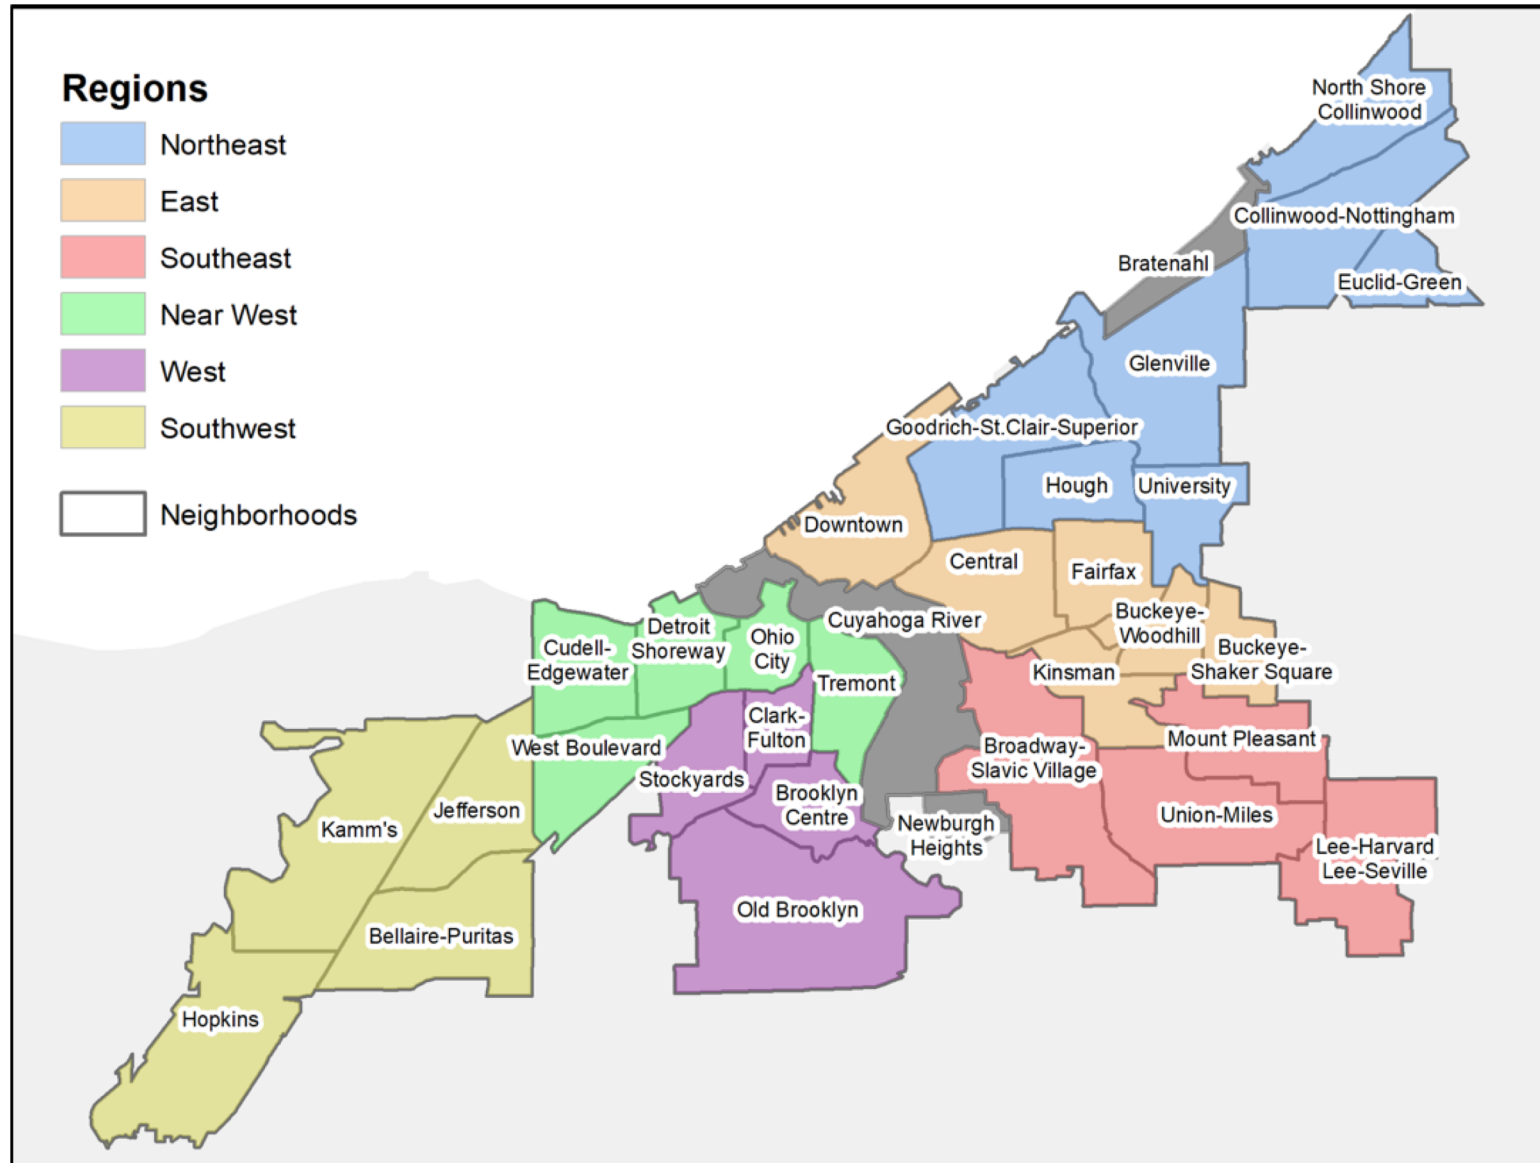

Building Use and Condition

- Proportion of the building that is being used by students, including spaces used for special populations and PreK services
- Condition of the school building

¹ This metric is only applied to CMSD-operated schools, as each charter operator determines their own thresholds for program viability

Reference: map of regions

Citywide Analysis Key Takeaways

Academic Quality

- 26% of K-8 students, or more than 10,000 out of 38,000, attend an A, B or C-rated school. 19% of high school students, or roughly 2,800 of 14,000, attend an A, B or C school.
- Quality access is higher for west side residents for K-8 and east side residents for high school.

Enrollment and Choice

- By 2022-23, K-8 enrollment is forecast to decline 3.9% while high school is forecast to increase by 0.7%. Northeast and Near West are the regions with the largest declines.
- 45% of K-8 students and 43% of high school students residing in Cleveland attend a charter or private school.

Program Viability

- For District K-8 programs, 51% are below the minimum enrollment target of 360 students and 78% are below the desired enrollment level of 450 students.
- 79% of District high school programs are below the minimum viable target of 400 students and 95% are below the desired enrollment level of 500 students.

Building Use and Condition

- There are 8,000 unused K-8 seats in District buildings and 9,000 excess high school seats. Reported charter capacity points to more than 3,000 additional empty K-8 seats.
- 65% of District K-8 enrollment and approximately 57% of District high school enrollment is in buildings constructed or renovated since 2002.

Citywide summary: K-8 regional performance against 4 key metrics – District only

Region	 Academic Quality	 Enrollment Forecast	 Program Viability	 Building Use and Condition
Northeast	25% (↑)	-8.5%	19%	59%
East	0% (--)	-2.2%	33%	80%
Southeast	12% (--)	-2.7%	62%	78%
Near West	15% (↑)	-7.9%	64%	87%
West	27% (↑)	0.1%	71%	64%
Southwest	55% (↑)	3.4%	63%	98%

Metric	2018 Report Card % K-8 Enrollment A, B, C (3-year average trend ¹)	2022-23 vs. 2017-18 Forecast K-8 Student Population Change	2017-18 K-8 Schools above 360 ²	2017-18 Adjusted Capacity Utilization ³
School set	District Only	District Only	District Only	District Only
Key	> 80% = Green 51 to 80% = Yellow 31 to 50% = Orange ≤ 30% = Red (>0.5 = improving 0.5 to -0.5 = flat <-0.5 = declining)	≥ 5% = Green 0 to 4% = Yellow -1 to -4% = Orange ≤ -5% = Red	> 80% = Green 71 to 80% = Yellow 61 to 70% = Orange ≤ 60% = Red	>80% = Green 71 to 80% = Yellow 61 to 70% = Orange ≤ 60% = Red

¹ Based on weighted average of PI and K-3 literacy performance trend of schools in region

² A minimum enrollment threshold of 360 students was determined based off of the required enrollment to allow for the baseline desired teaching and learning experience of 2 classrooms of 20 students per grade level for grades K to 8

³ Adjusted capacity utilization takes into account the current usage of classrooms for special populations, including Pre-K and Special Education

Citywide summary: K-8 regional performance against 4 key metrics – Charter only

¹ Based on weighted average of performance trend of schools in region

² Adjusted capacity utilization takes into account the current usage of classrooms for special populations, including Pre-K and Special Education. Only charter schools with capacity figures reported to CWRU were considered for the facility utilization

How many K-8 students are enrolled in quality schools?

2017-18 K-8 Enrollment by 2018 ODE Report Card Grade

- 26% of K-8 students, or more than 10,000 out of 38,000, attend an A, B or C-rated school.
- Overall, a majority of K-8 students (74%) are attending a D or F-rated school.
- 35% of charter students are attending an A, B or C school, slightly better than District schools, though both sectors have considerable progress to make to meet demand for quality.

¹ Ohio scores are for all schools, due to unavailability for just K-8 schools

How are quality K-8 schools distributed throughout the city?

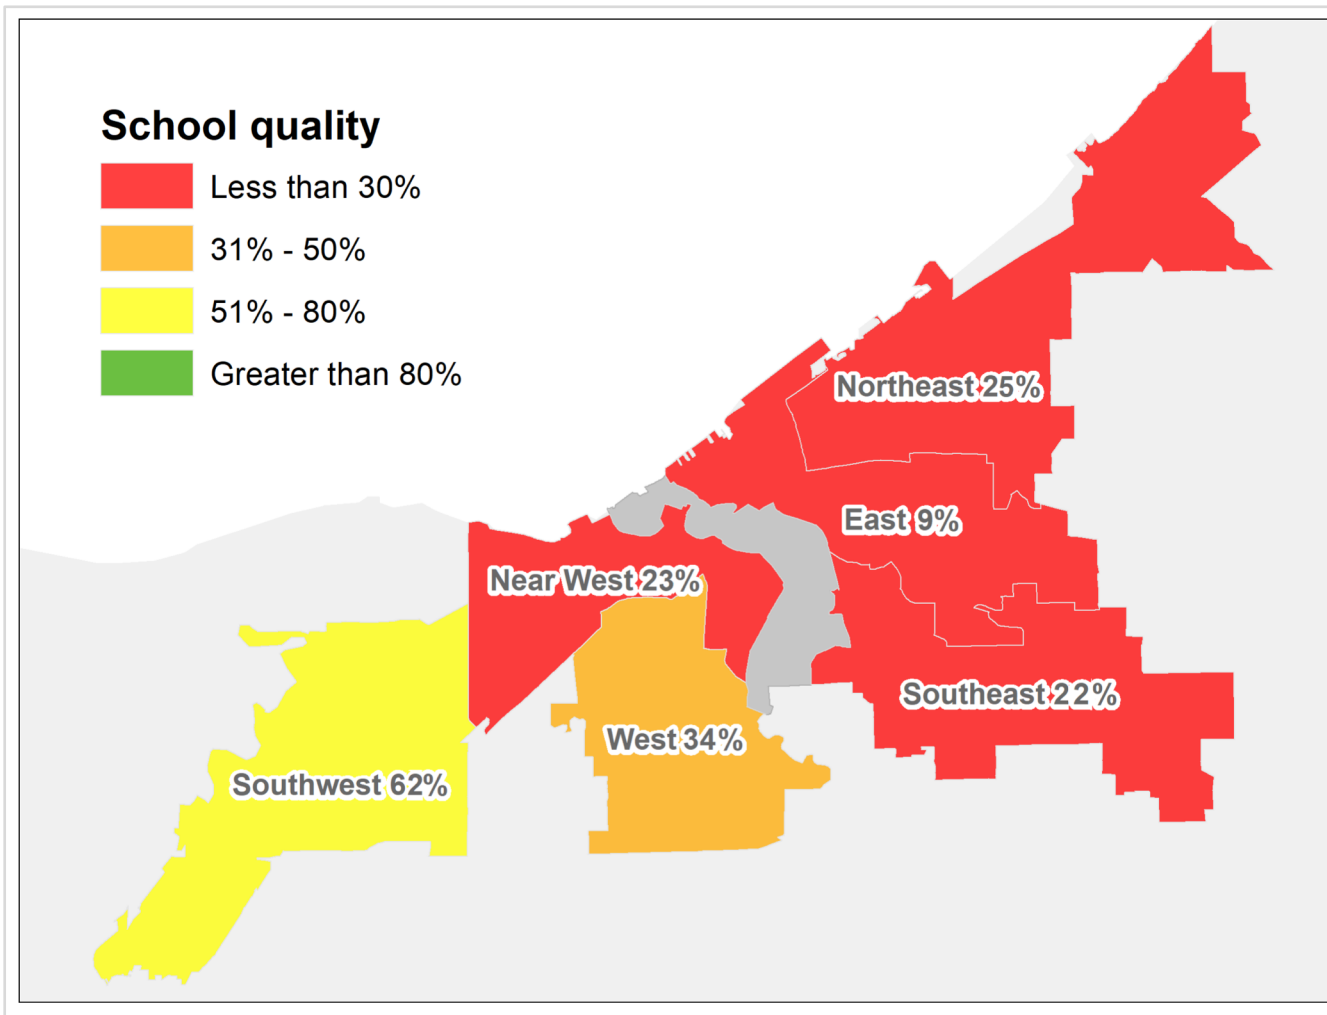

2017-18 K-8 Enrollment of District and Charter Schools by Region of School Location

- While all regions require improved quality, there is currently better access to high quality school options on the west side of Cleveland at the K-8 level.
- 62% of K-8 seats in the Southwest region are rated A, B or C, while the East region has 9% of seats rated A, B or C.

Which regions of the city have the most students in quality K-8 schools?

Percent of K-8 Students Attending District or Charter Schools Rated A, B or C on the 2018 Ohio Report Card

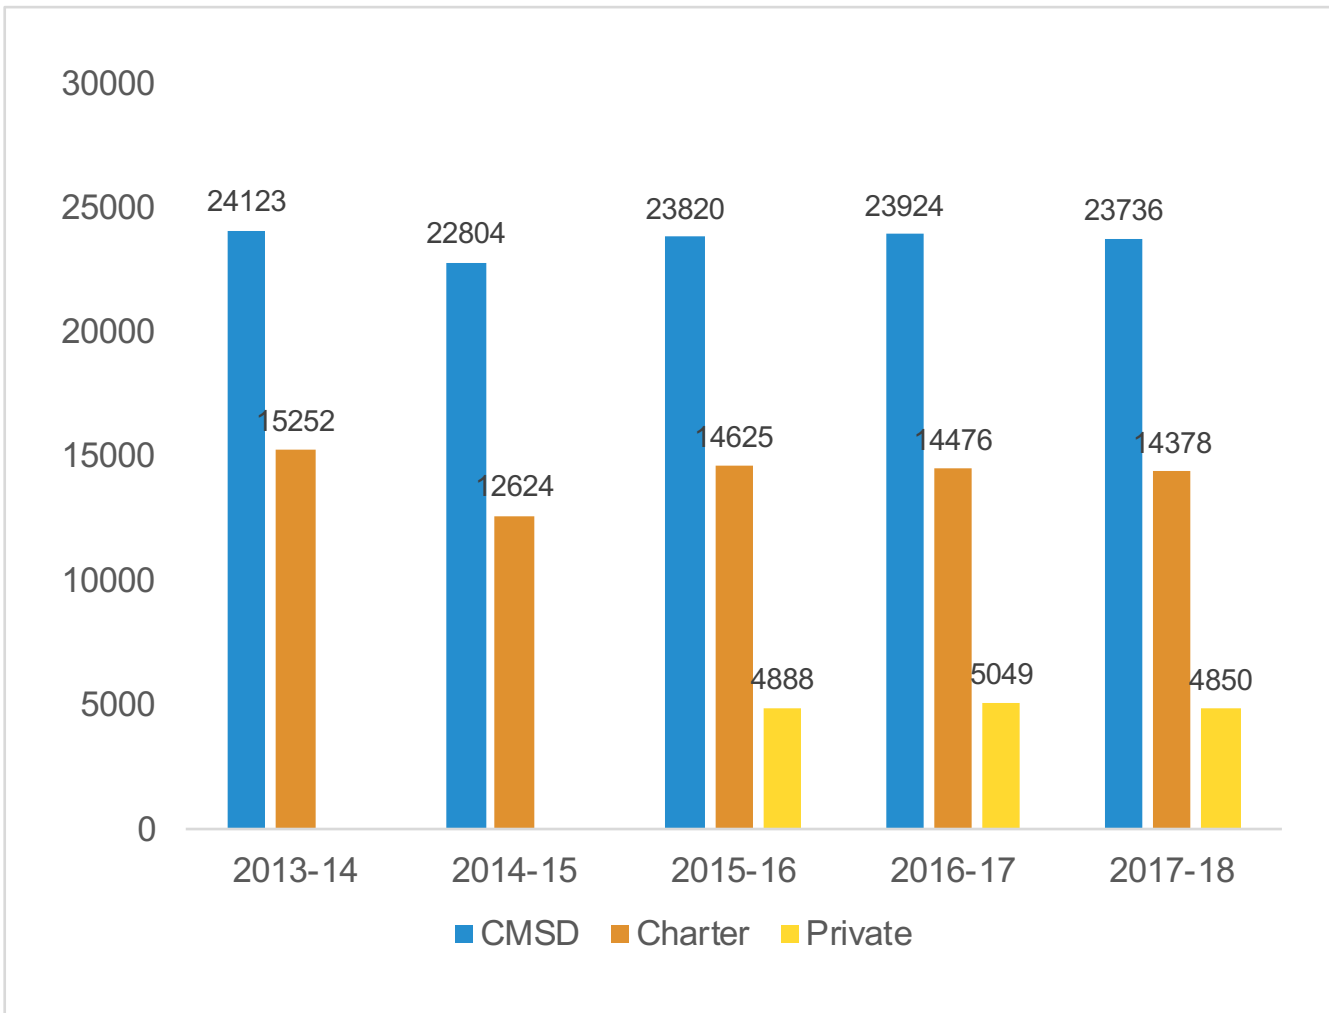

- While all regions require improved quality, there is currently better access to high quality school options on the west side of Cleveland at the K-8 level.
- 62% of K-8 seats in the Southwest region are rated A, B or C, while the East region has 9% of seats rated A, B or C.

What are historical K-8 enrollment trends?

March 19, 2019 Discussion Draft

Annual K-8 Enrollment by District, Charter and Private School Type

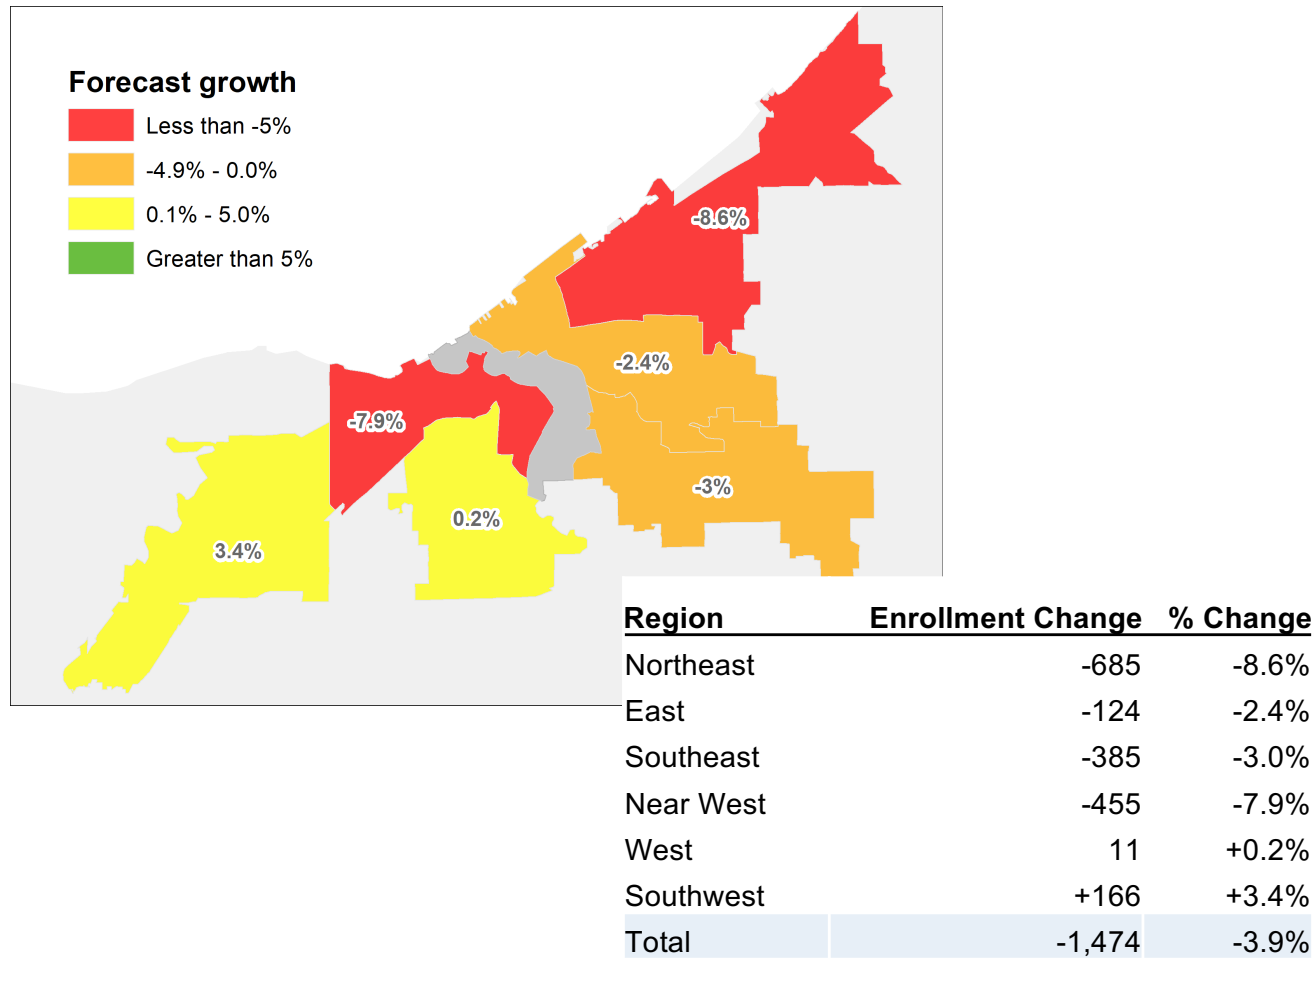

- District enrollment is largely flat from 2013-17.
- Charter enrollment peaked in 2013-14 and has declined 5.7% since.
- Private school scholarship enrollment is flat since 2015-16, which is the earliest student-level data available.

What do enrollment forecasts suggest about changes in K-8 enrollment?

2017-18 to 2022-23 Enrollment Forecast of District and Charter Students

- Enrollment across both District and charters is forecast to decline by 3.9%, or 1,474 students, by 2022-23.
- The forecast shows large variances by region, with growth in West and Southwest, though large declines in Northeast and Near West.

How are K-8 students choosing among sectors?

March 19, 2019 Discussion Draft

Proportion of K-8 Students Enrolled in District Versus Charter or Private School Options

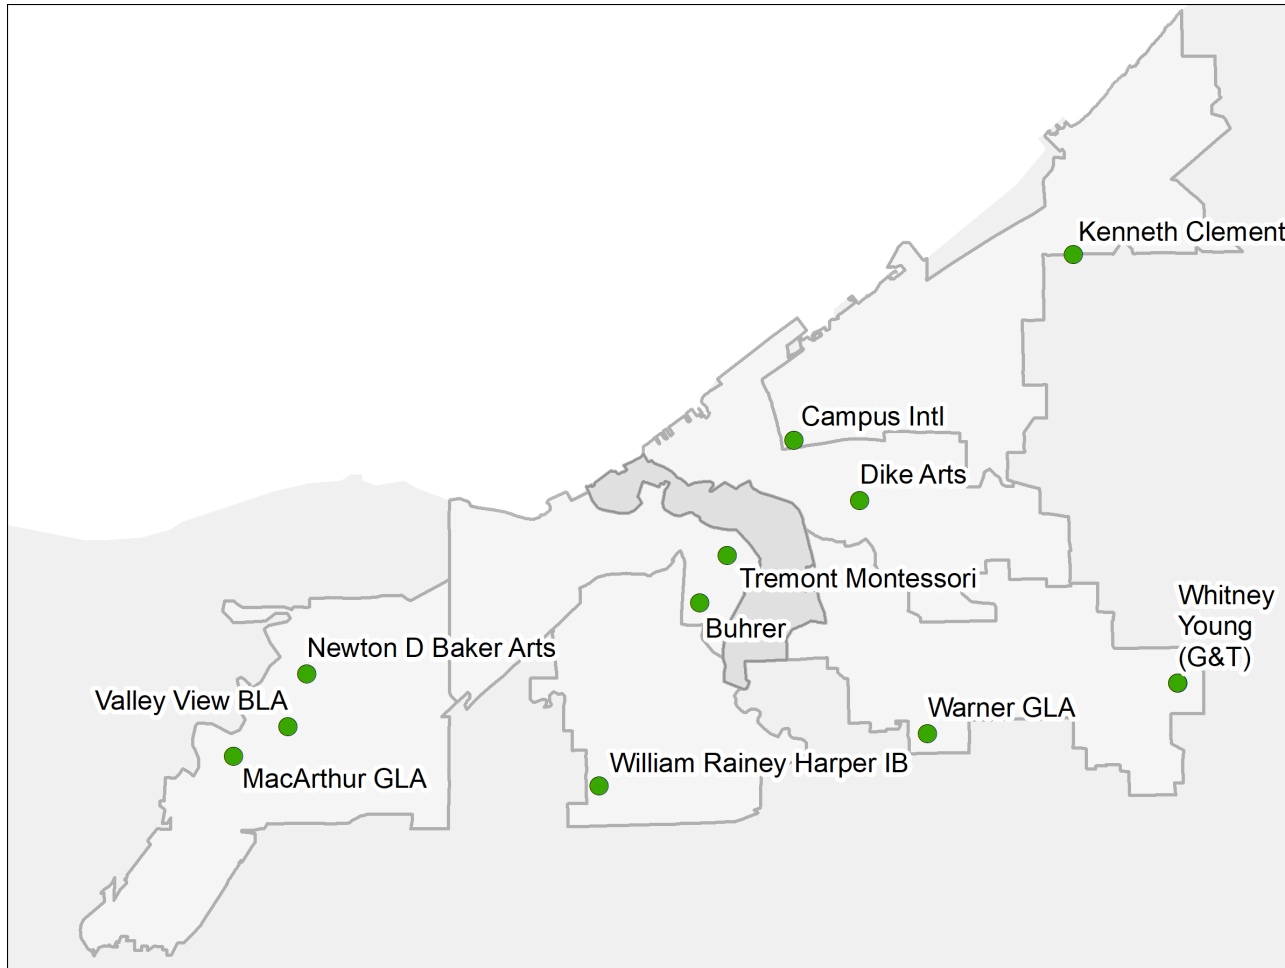

- In 2017-18, 19,228 students who live in Cleveland attended either a charter or private K-8 school, which represents 45% of all students in the city of Cleveland¹.
- The Northeast region has the lowest proportion of families choosing District schools (51%), while the Near West region has the highest.

¹ Represents 45% of students in the ODE databases attending either District, another district, charter, or private school on a scholarship.

Where are unique District K-8 academic programs located?

2017-18 K-8 District Schools with Specialized Academic Programs

- While choice is not widely promoted at the K-8 level, there are several specific District academic programs that could attract choice students from other regions.
- Several models exist on both sides of town like girls and boys leadership academies (BLA, GLA), arts, and International Baccalaureate (IB).

What proportion of District K-8 schools meet minimum enrollment targets for program viability?

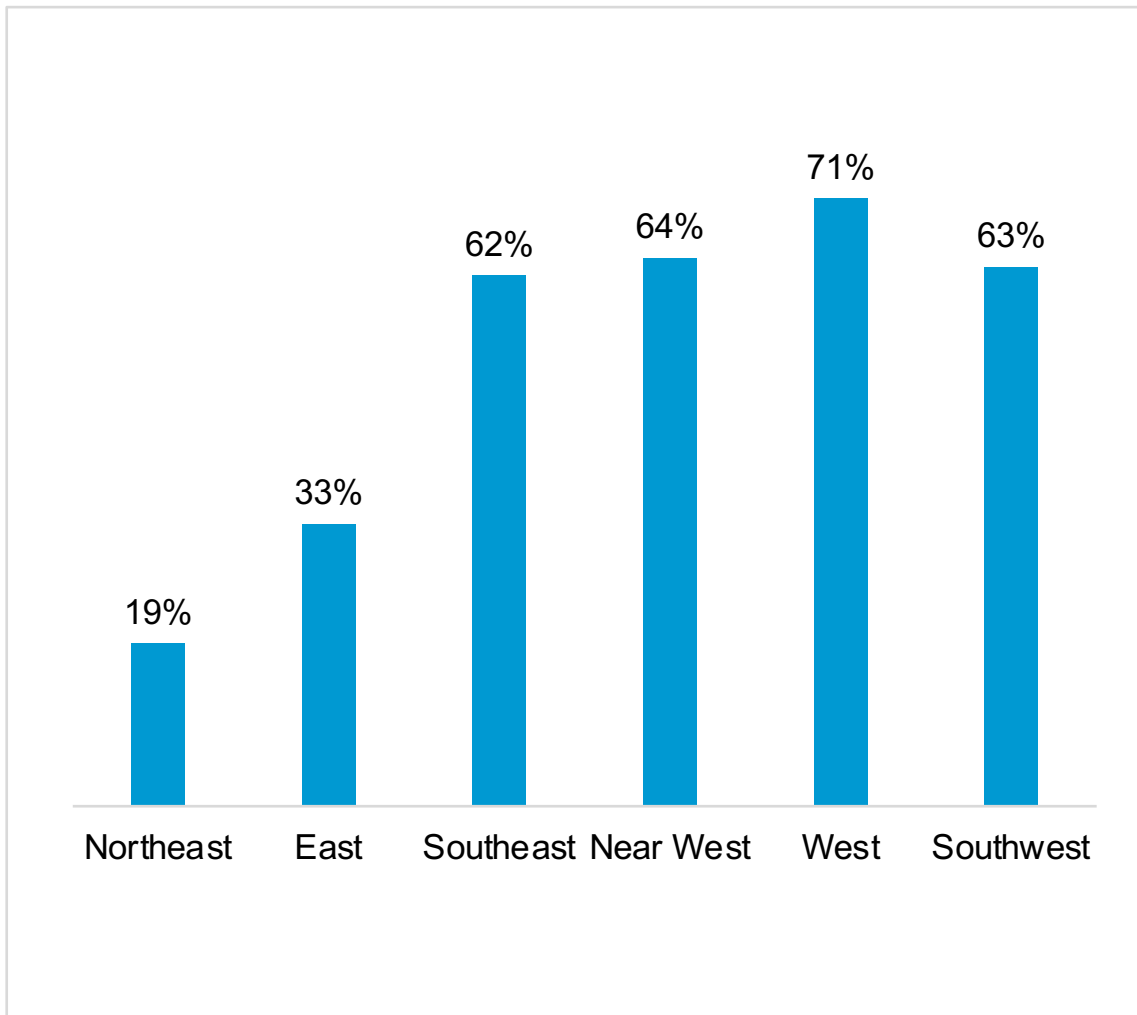

District K-8 Schools with 2017-18 Enrollment Above 360 Students

- District K-8 schools with at least 360 students are more likely to have the resources to sustain the baseline desired learning and teaching experience. This minimum enrollment target is the equivalent of about 20 students per class with two classes for each grade level from kindergarten to 8th grade.
- Ideally, District K-8 schools would enroll closer to 450 students, or about 25 students per class with two classes for each grade level, allowing for funding necessary for a more vibrant and viable school program.
- 49% of District K-8 schools are above the minimum viable enrollment target of 360 while 22% are above the desired enrollment level of 450 students.

What regions have the highest concentrations of K-8 schools above minimum viable enrollment?

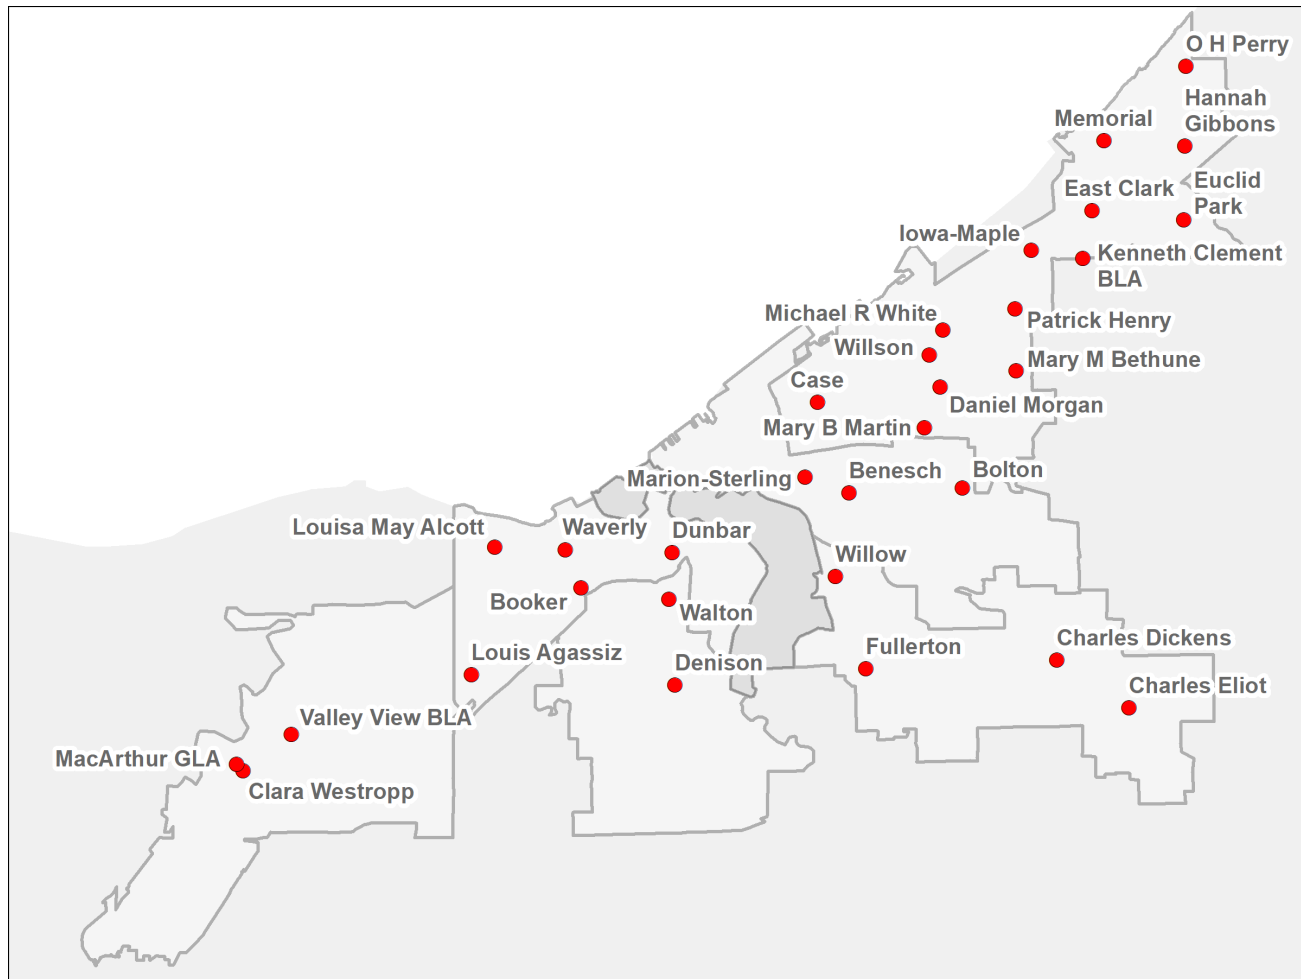

District K-8 Schools with 2017-18 Enrollment Above 360 Students

- The Northeast and East regions are outliers in terms of the disproportionately low number of schools above the minimum viable enrollment target of 360 students.
- The West region has the highest proportion of schools that meet or exceed the minimum enrollment target of 360 students.
- Two-thirds of under-enrolled K-8 programs are located in regions that are forecast to have declining enrollment.

Which District K-8 schools are below minimum program viability enrollment levels?

2017-18 District Schools with Fewer Than 360 K-8 Students

There are District schools that do not meet the minimum viable enrollment target of 360 students located across the city, with heavier concentrations in the Northeast and East regions.

What is the relationship between K-8 school quality and school enrollment size?

March 19, 2019 Discussion Draft

2017-18 K-8 Enrollment with 2018 ODE Report Card Score

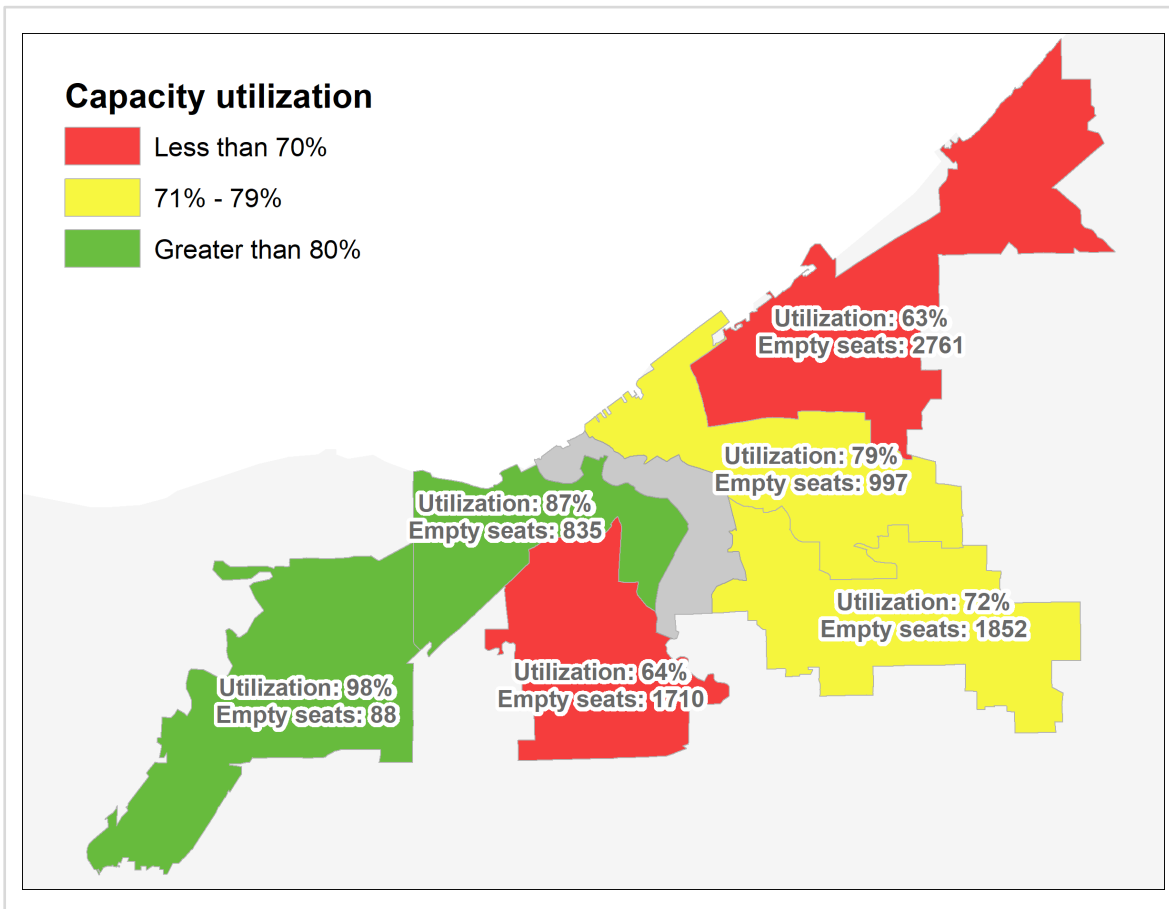

2018 Report Card Score	# Schools		# Students	
	Below 360	Above 360	Below 360	Above 360
A	-	-	-	-
B	2	-	655	
C	9	5	2,148	2,283
D	8	23	1,994	10,627
F	15	5	4,377	2,220
Citywide	34	33	9,174	15,130

- While 44% of schools below the program viability target of 360 were rated F, only 15% of schools above the target were rated F on the 2018 Ohio Report Card.
- Additionally, 75% of F-rated schools are below the enrollment target.

What percentage of District K-8 seats are utilized?

March 19, 2019 Discussion Draft

2017-18 K-8 Building Utilization and Corresponding Empty Seats

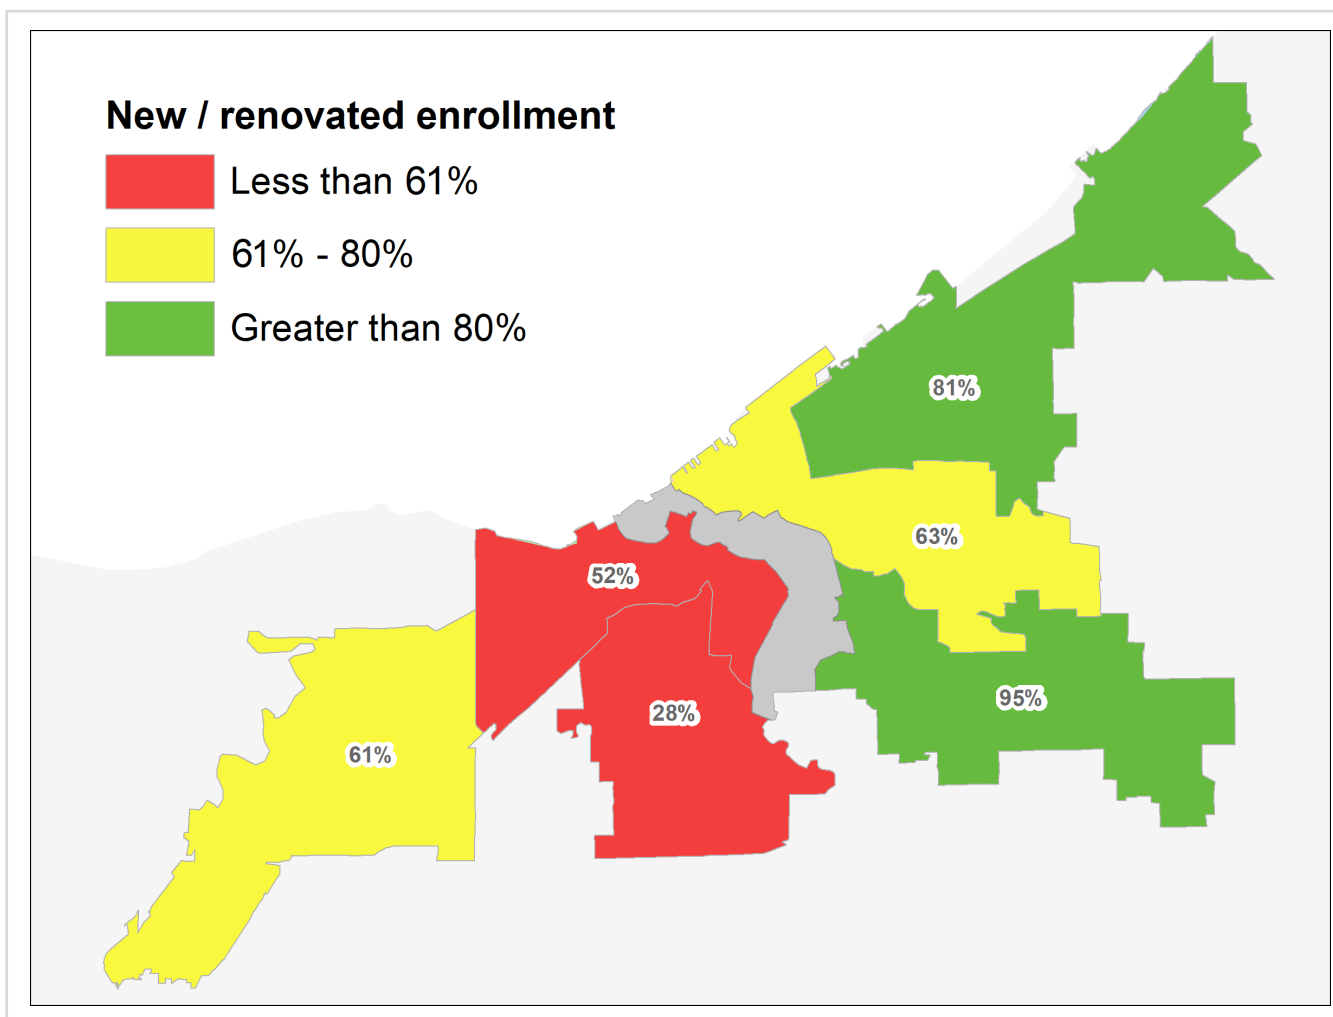

- Overall, about 25% of seats in District K-8 buildings are empty. There is enough unused space in District K-8 buildings to accommodate at least 8,000 more students than are currently enrolled. Nearly half of these empty seats are in schools rated A, B or C.
- Reported charter capacity points to more than 3,000 additional empty K-8 seats, suggesting there are more than 11,000 excess seats in K-8 buildings across the city.
- The Northeast and West regions have the lowest building utilization rates, while the Near West and Southwest have the highest.

METHOD: 2017-18 enrollment divided by 2017-18 facility capacity, adjusted for PreK and special education classrooms

SOURCE: 2017-18 ODE headcount enrollment data; 2017-18 capacity figures provided by CMSD Operations, adjusted for 2018-19 PreK and special education classrooms
Charter capacity figures as reported to CWRU

What percentage of District K-8 enrollment is located in buildings constructed or renovated since 2002?

2017-18 District K-8 Enrollment by Building Age

- Overall, 65% of District K-8 enrollment is in buildings constructed or renovated since 2002, when the current building campaign launched.
- The Near West and West regions have the lowest proportion of students enrolled in buildings that are new or renovated since 2002, while the Northeast and Southeast have the highest.

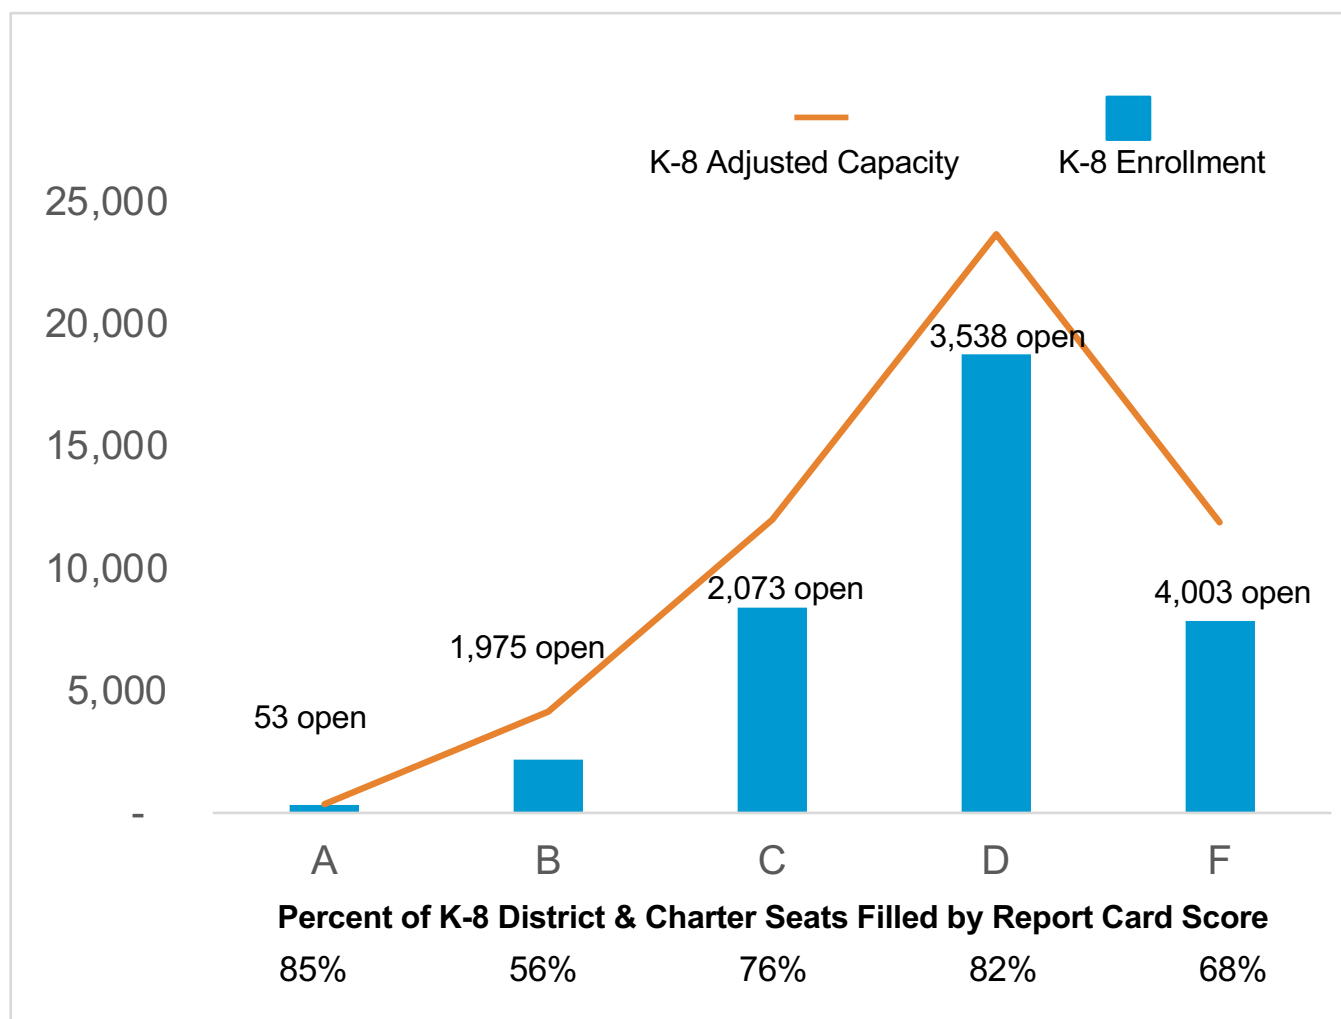

METHOD: 2017-18 District K-8 enrollment in new or renovated facilities divided by total regional District K-8 enrollment

SOURCE: CMSD Operations Department for new/renovated facilities, 2017-18 ODE headcount enrollment data

What opportunities exist to maximize the capacity at higher quality K-8 schools?

2017-18 K-8 Enrollment and Adjusted Capacity of District and Charter Schools by 2018 ODE Report Card Score

- While A-rated K-8 schools have the highest utilization rate, B-rated schools are filled to the lowest percentage.
- There are more than 4,000 open seats in A, B or C-rated schools, which could serve close to half of students attending F-rated schools today.

Citywide summary: high school regional performance against 4 key metrics – District only

Region	 Academic Quality	 Enrollment Forecast	 Program Viability	 Building Use and Condition
Northeast	38% (--)	-6.0%	20%	43%
East	27% (↑)	0.0%	0%	60%
Southeast	25% (--)	1.4%	14%	48%

★ How many HS students are enrolled in quality schools?

2017-18 Charter and District High School Enrollment by 2018 ODE Report Card Scores

- 19% of high school students, or roughly 2,800 of 14,000 attend an A, B or C-rated school.
- Overall, a majority of students (81%) are attending a D or F-rated school.
- Most of the District students attending an A, B or C-rated school are in schools with admissions criteria.

¹ Excludes alternative high schools, but includes virtual charter high schools

² Ohio is for all schools, unavailable for just high schools

What is the quality of high schools students in regions across the city are attending?

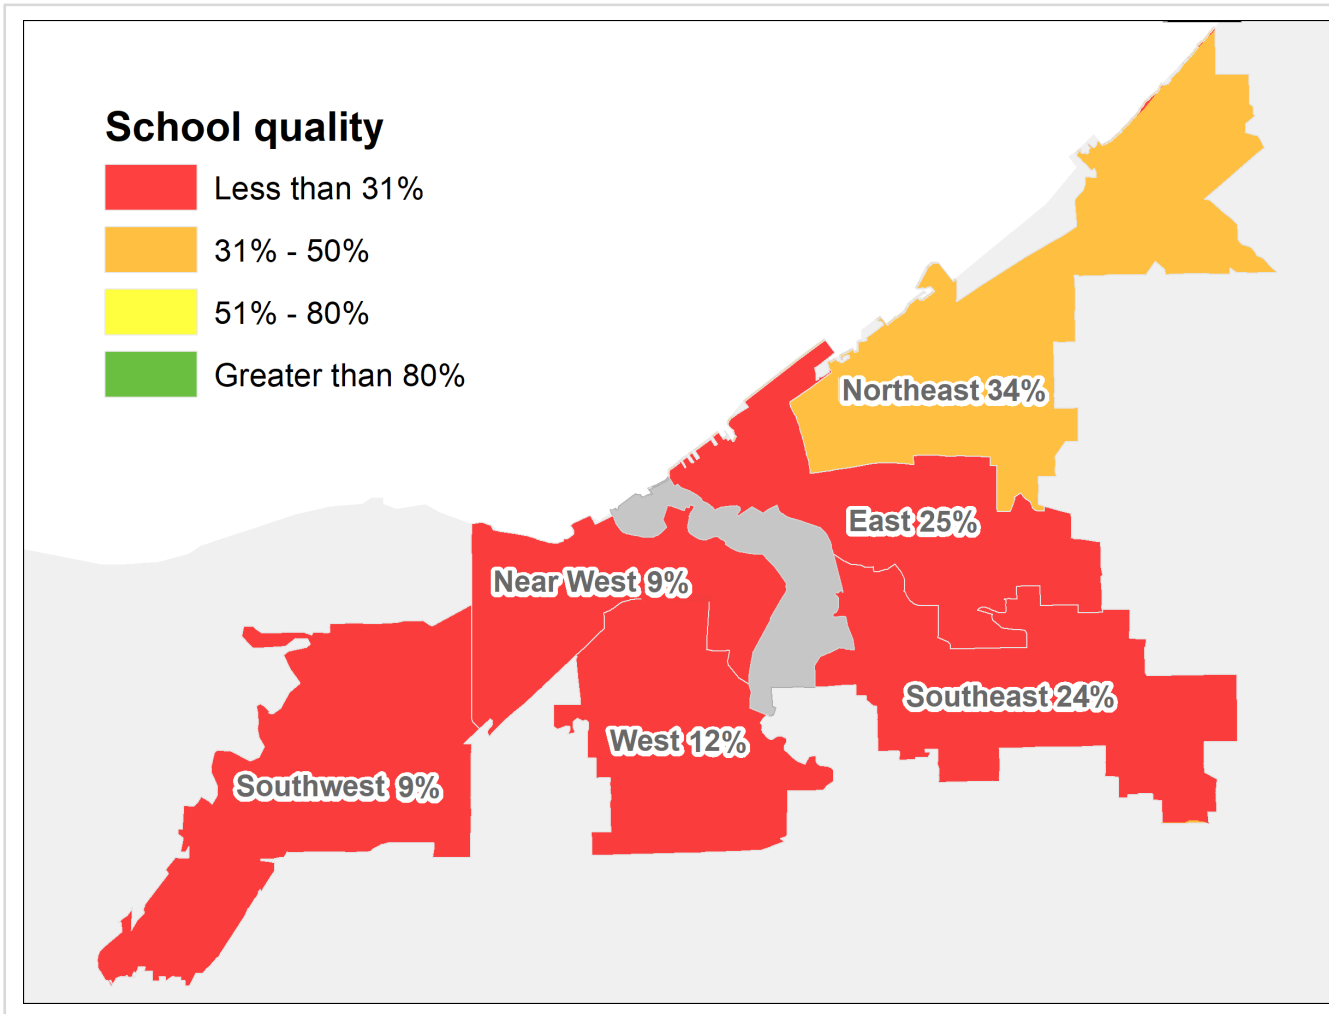

Percent of Residents Attending District and Charter Schools by Report Card Score

- East side residents are attending A, B or C-rated schools at roughly 20 percentage points higher than their west side peers.
- There is greater access to higher quality high schools for east side residents due to the proximity of admissions criteria schools, in the University Circle area.

Which regions of the city have the most students attending quality high schools?

Percent of K-8 Students Attending District or Charter Schools Rated A, B or C on the 2018 Ohio Report Card

There is greater access to higher quality high schools for east side residents due to the proximity of admissions criteria schools.

What are historical high school enrollment trends?

March 19, 2019 Discussion Draft

Annual K-8 Enrollment by District, Charter and Private School Type

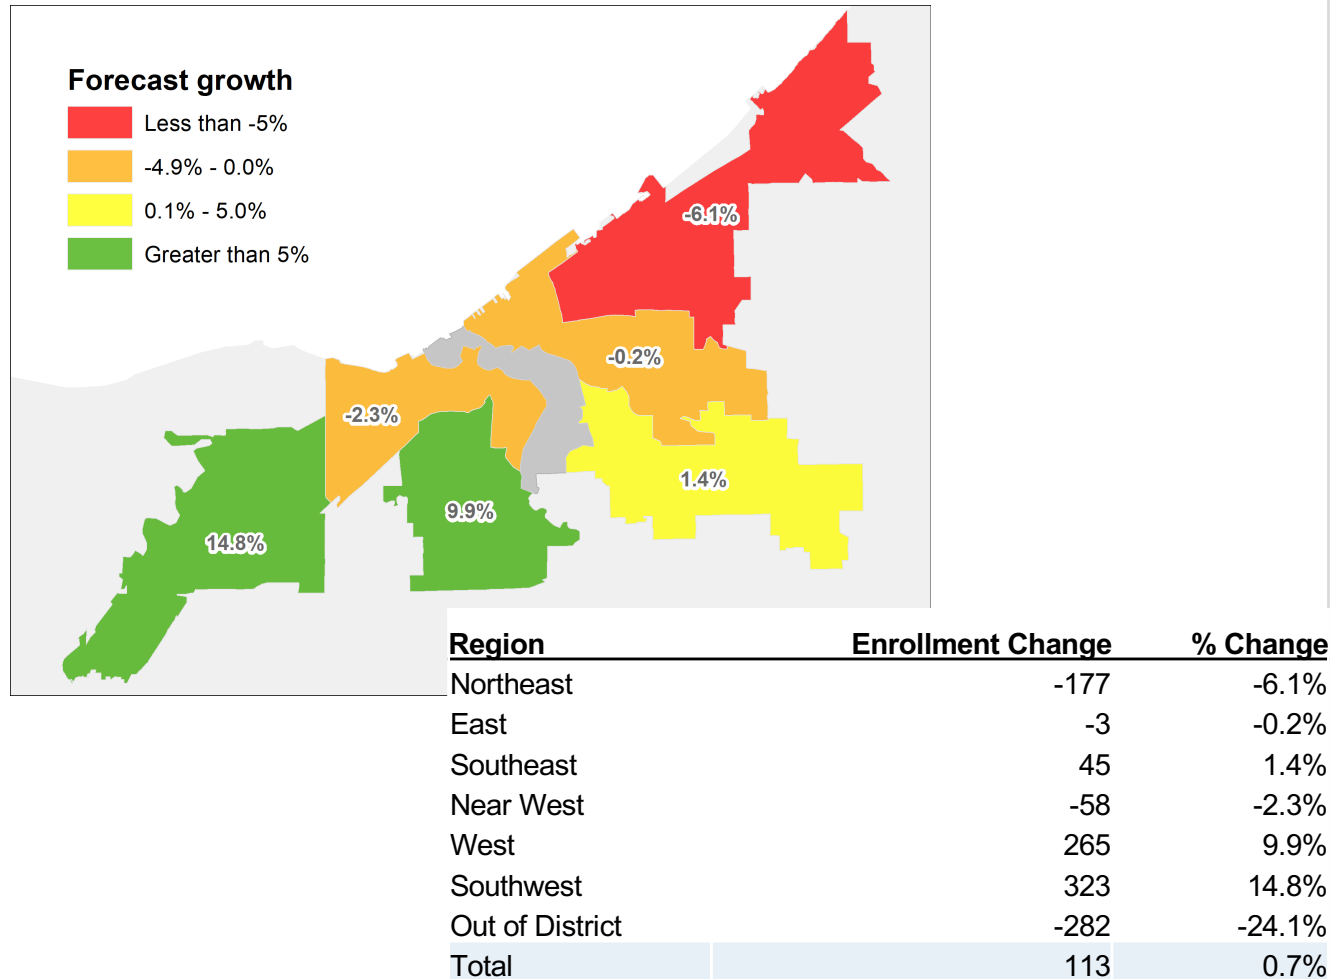

- District high school enrollment is largely flat from 2013-17.
- Charter high school enrollment peaked in 2013 and has since declined by 10.7%, with many students enrolled in alternative high school models.

What do enrollment forecasts suggest about changes in high school enrollment?

2017-18 to 2022-23 Enrollment Forecast of District and Charter Students

- Enrollment across both District and charter schools is forecast to increase by 0.7%, or 113 students, by 2022-23.
- The forecast shows large variances by region, with growth in West and Southwest, though large declines in the Northeast.

How are high school students choosing among sectors?

Proportion of High School Students Enrolled in District Versus Charter or Private School Options

In 2017-18, 7,599 students who live in CMSD attended either a charter or private high school, which represents 43% of students.

How does where students live impact where they choose to attend high school?

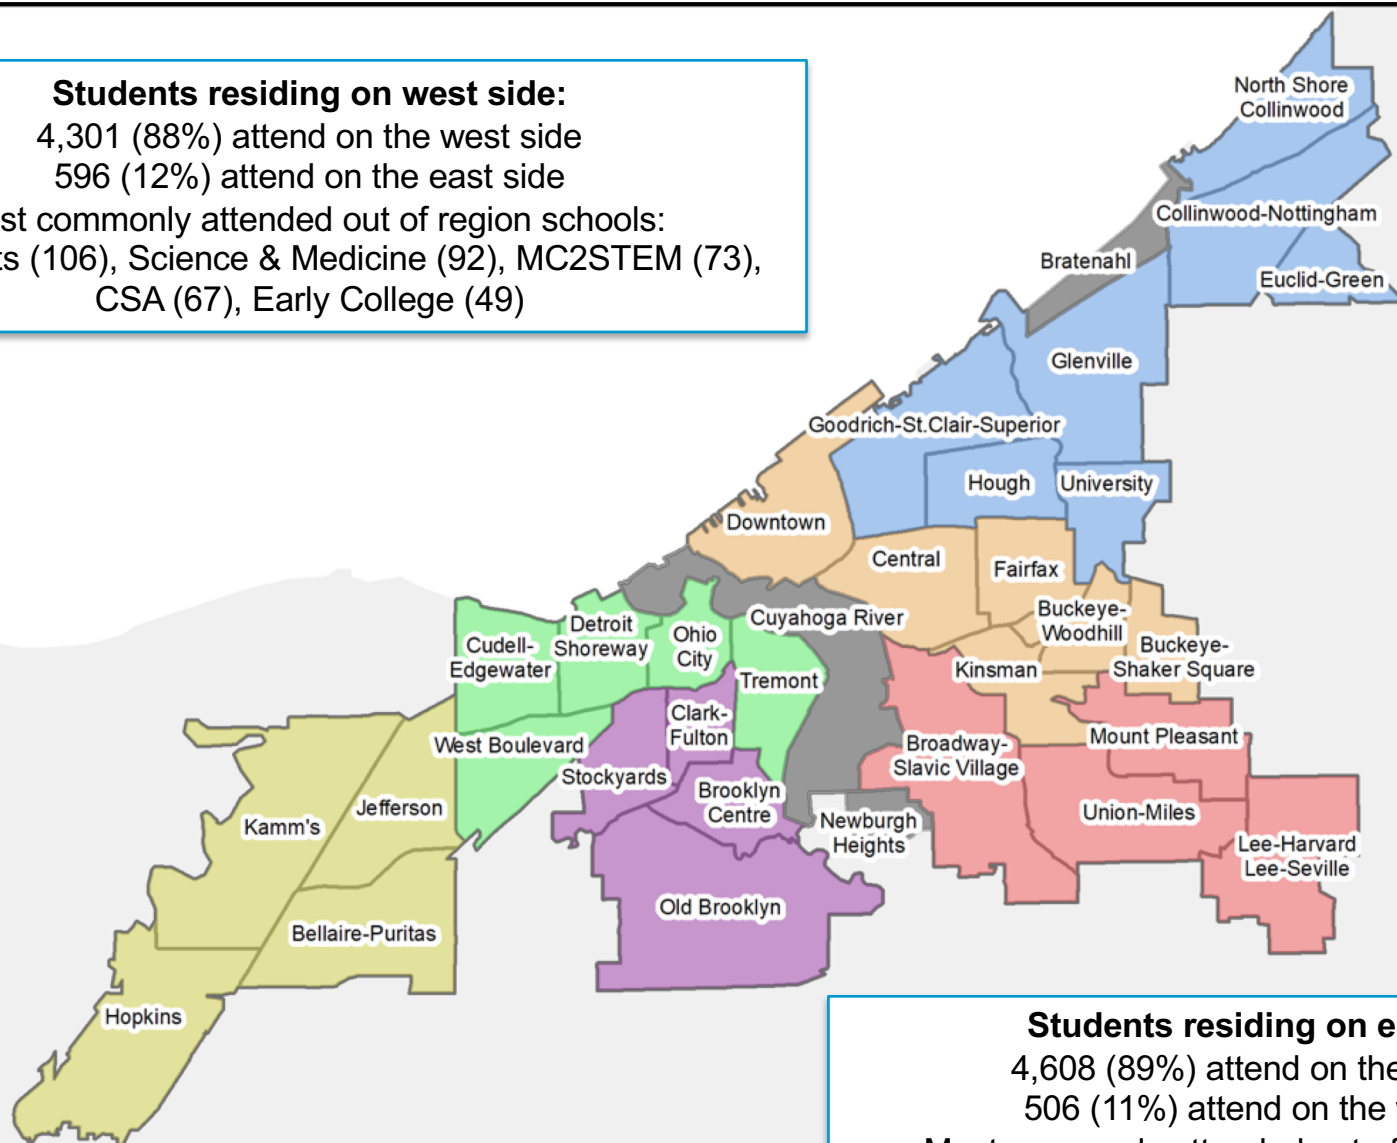

Students residing on west side:

4,301 (88%) attend on the west side

596 (12%) attend on the east side

Most commonly attended out of region schools:

Digital Arts (106), Science & Medicine (92), MC2STEM (73),
CSA (67), Early College (49)

Students residing on east side:

4,608 (89%) attend on the east side

506 (11%) attend on the west side

Most commonly attended out of region schools:

Rhodes (94), Max Hayes (87), Lincoln-West (37), TJ (35)

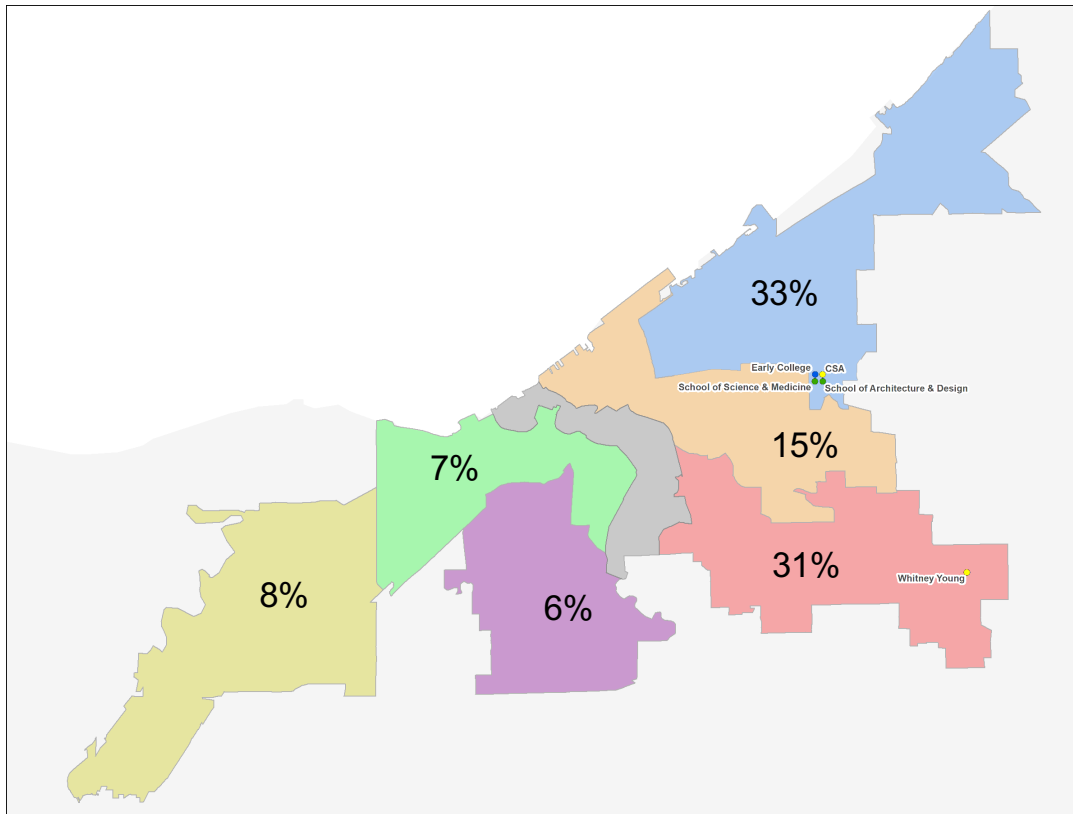

NOTE: For reference: 89% of Charter high school students stay east, 68% stay west

SOURCE: 2017-18 geo-coded District and charter high school student-level data

Where do students attending admissions criteria high schools reside?

2017-18 Enrollment in District High School Admissions Criteria High Schools by Region of Residence

Region of Residence	# / % of Enrollment
Northeast	399 / 33%
East	179 / 15%
Southeast	375 / 31%
Near West	80 / 7%
West	70 / 6%
Southwest	90 / 8%

- 80% of students enrolled in admissions criteria high schools (shown above) reside on the east side.
- This is a major contributing factor to east side residents having greater access to higher performing schools.

What proportion of District high schools meet minimum enrollment targets for program viability?

District High Schools with 2017-18 Enrollment Above 400 Students

- District high school programs with at least 400 students are more likely to have the resources to sustain the baseline desired learning and teaching experience. This minimum enrollment target is the equivalent of 100 students per grade in 9th through 12th grades.
- Ideally, District high school programs would enroll closer to 500 students, or about 125 students for each grade level, allowing for funding necessary for a more vibrant and viable school program.
- 21% of District high school programs are above the minimum viable enrollment target of 400 while 5% are above the desired enrollment level of 500 students.

What regions have the highest concentrations of high schools above minimum viable enrollment?

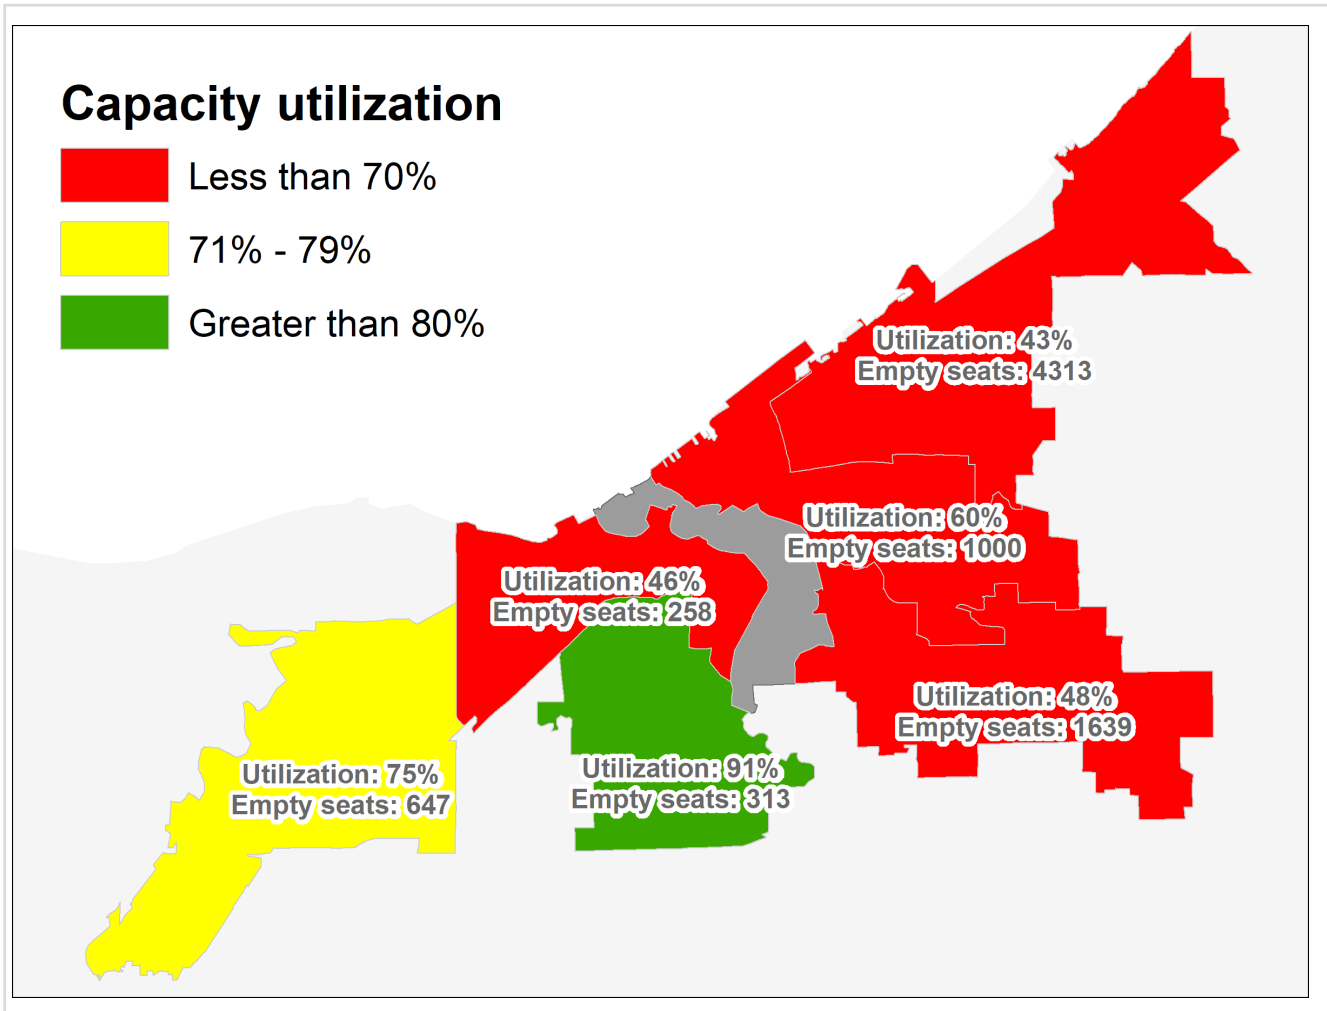

District High Schools with 2017-18 Enrollment Above 400 Students

- The Southwest region has by far the highest proportion of high school programs that meet the minimum program viability target of 400 students.
- Half of the high school programs below the minimum viable enrollment target are located in regions that are forecast to have declining enrollment, suggesting those schools will continue to struggle to achieve viable enrollment levels.

What percentage of District high school seats are utilized?

2017-18 High School Building Utilization and Corresponding Empty Seats

- District high school enrollment is more than 8,000 students below adjusted building capacity. This means that roughly 40% of building space currently in operation today is unused.
- The Near West, Northeast and East have the lowest utilization rates, while the West and Southwest have the highest.

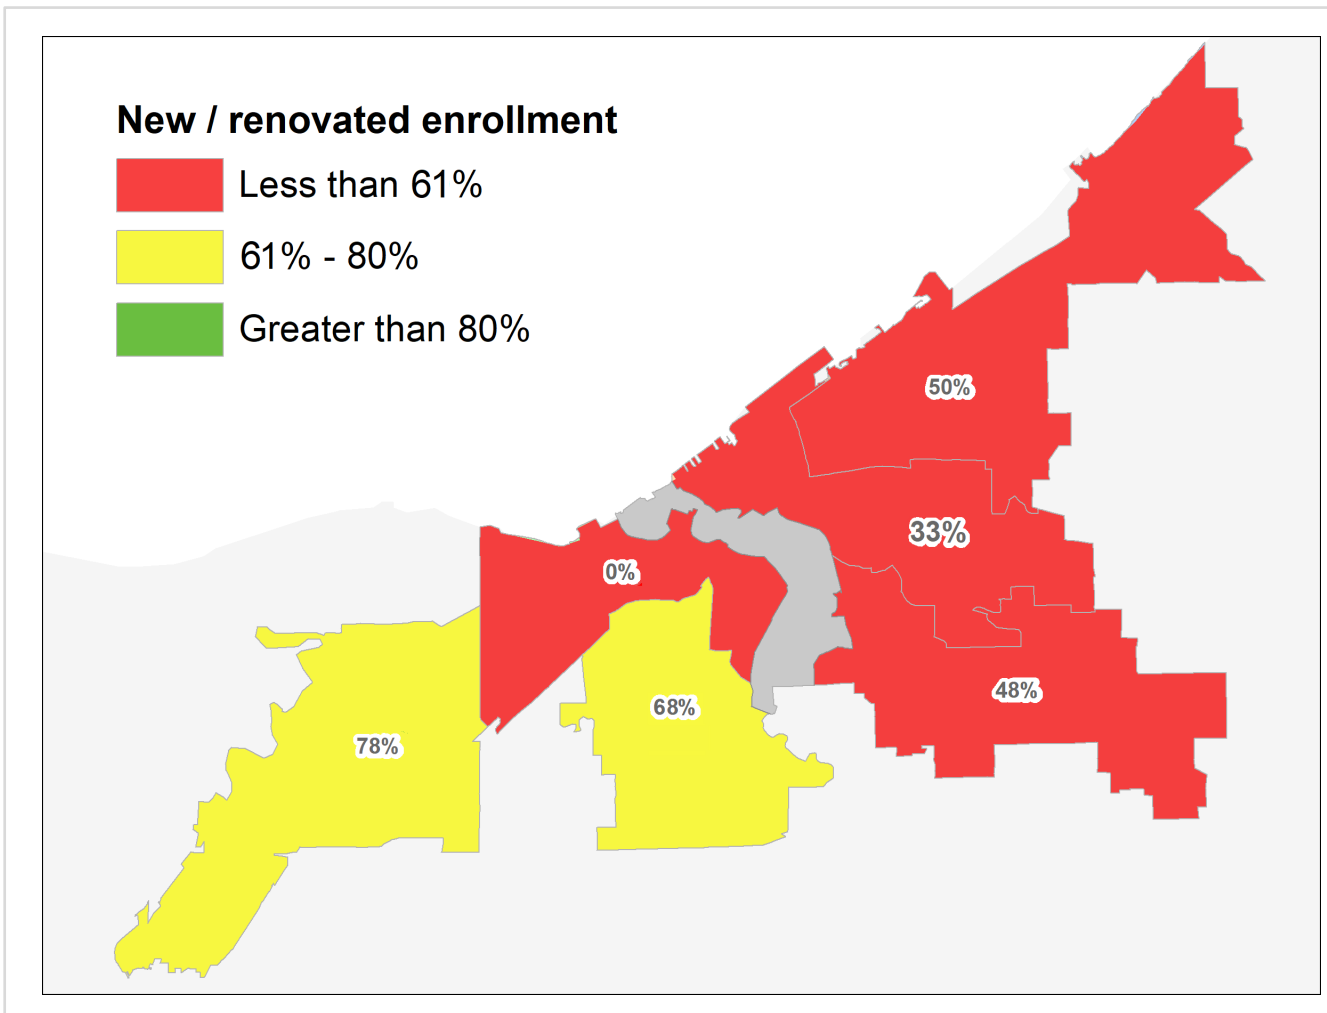

METHOD: 2017-18 enrollment divided by 2017-18 facility capacity, adjusted for special education classrooms

SOURCE: 2017-18 ODE headcount enrollment data; 2017-18 capacity figures provided by CMSD Operations, adjusted for 2018-19 special education classrooms

What percentage of District high school enrollment is located in buildings constructed or renovated since 2002?

2017-18 District High School Enrollment by Building Age

- Approximately 57% of students enrolled in District high schools are served in buildings that have been newly constructed or renovated since 2002.
- There are large regional gaps in the percentage of District high school enrollment in new or renovated buildings versus those constructed prior to 2002. The Near West gap will close with the opening of the West Side High School in 2020.

METHOD: 2017-18 District HS enrollment in new or renovated facilities divided by total regional District high school enrollment

SOURCE: CMSD Operations Department for new/renovated facilities, 2017-18 ODE headcount enrollment data

What opportunities exist to maximize the capacity at higher quality high schools?

March 19, 2019 Discussion Draft

2017-18 High School Enrollment and Adjusted Capacity of District Schools by 2018 ODE Report Card Score

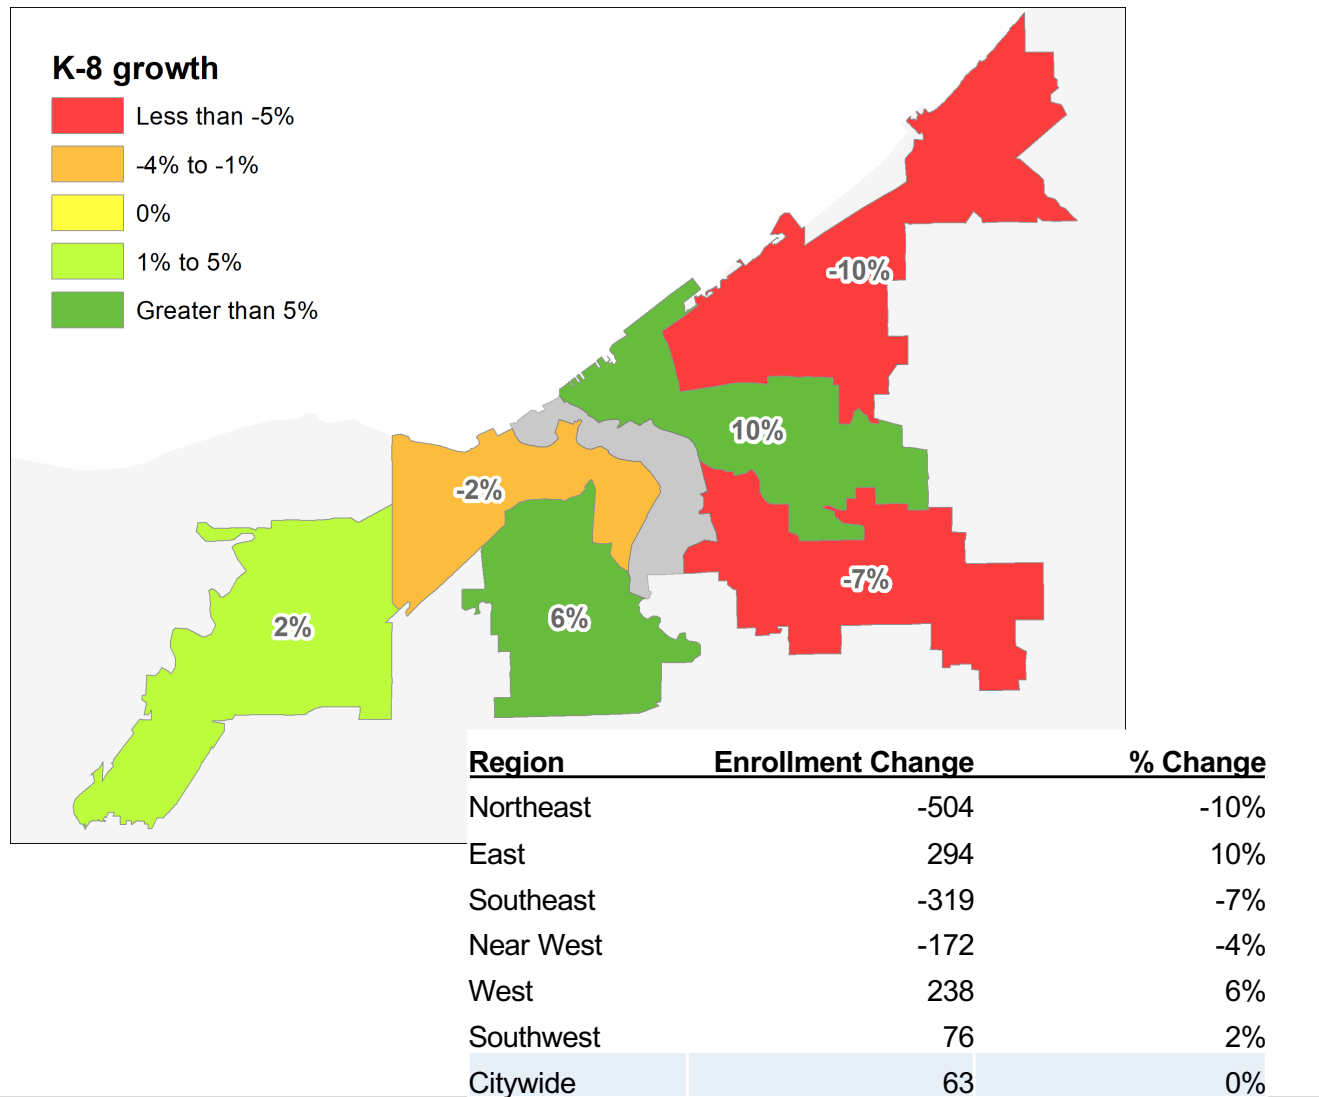

- F-rated schools are filled to a higher level than C or D-rated schools.
- Nearly all C-rated schools have space to accommodate more students.
- There are roughly 2,500 open seats in A, B, and C-rated schools, though many of these seats are in schools with admissions criteria.

Additional supporting analyses and reference maps

District prek-8 enrollment change: 2013-14 to 2017-18

March 19, 2019 Discussion Draft

2013-14 to 2017-18 K-8 Enrollment by Region of Residence Attending Any District School

While enrollment in District schools is relatively flat since 2013, there are variances between regions on each side of the city.

Live births to CMSD residents at time of birth

March 19, 2019 Discussion Draft

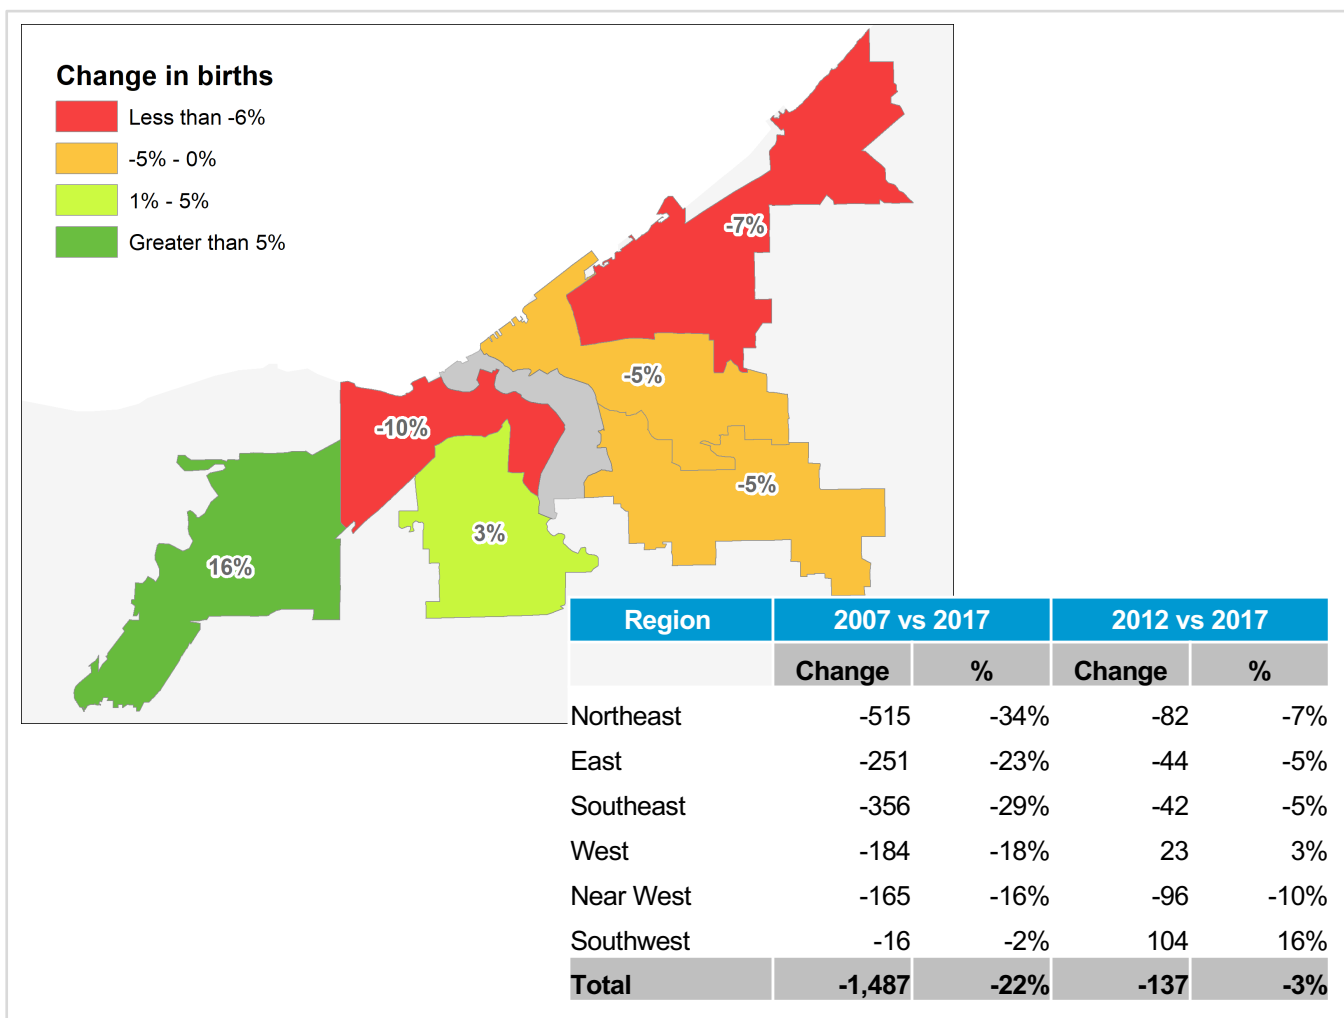

The number of live births declined 22% from 2007 to 2017, however the number has largely leveled off since 2012, down only 3%.

Live births by region

March 19, 2019 Discussion Draft

Change in Number of Births: 2012 vs. 2017

- Changes in birth rates vary significantly by region particularly on the west side.
- The 2007-2012 declines have already impacted K/1 enrollment in many areas and are likely to continue to do so as the 2012-2017 births become school-age.

Linking live births to kinder cohorts 5 years later

March 19, 2019 Discussion Draft

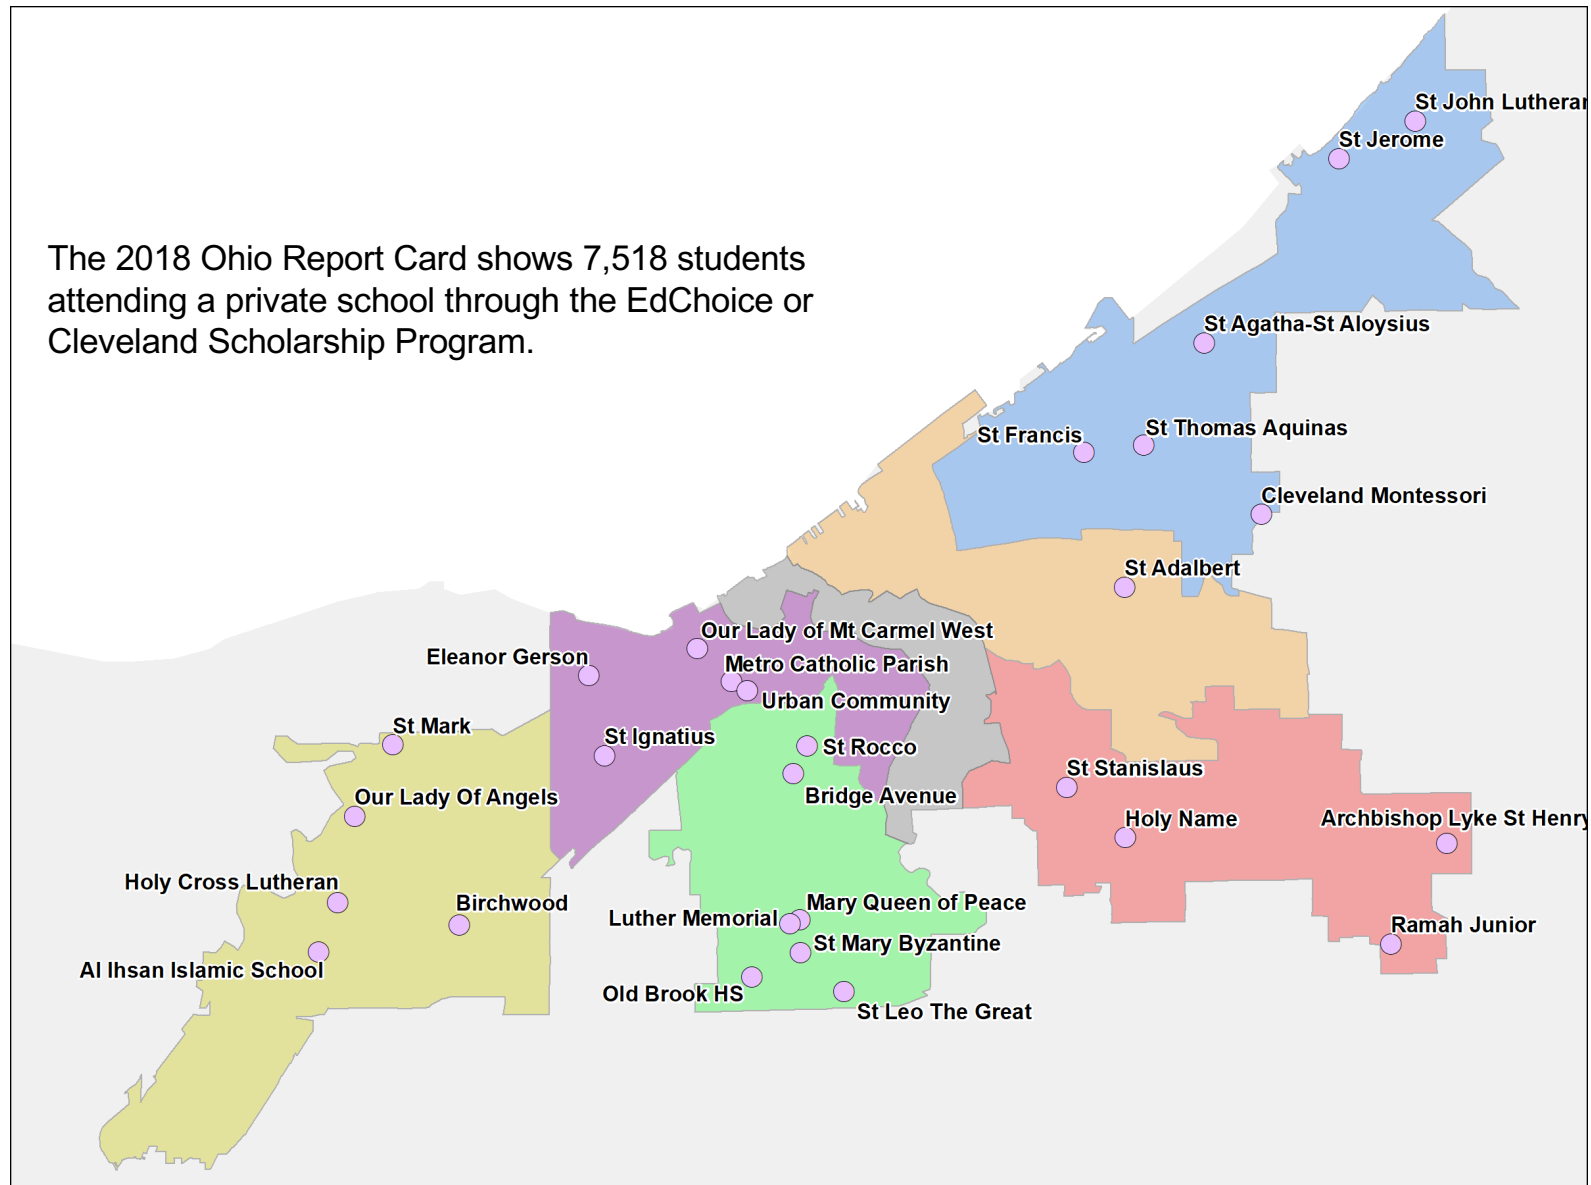

- In addition to tracking the number of live births in CMSD's geographic area, it is also important to track the size of the kindergarten cohort that yields 5 years later.
- For instance, most 2007 births would be in kindergarten in 2012. The data shows that the 2012 kinder cohort size is 46% of total 2007 births, while that % has increased to 54% for 2012 births attending kindergarten in 2017.

Private schools operating in the CMSD area

March 19, 2019 Discussion Draft

The 2018 Ohio Report Card shows 7,518 students attending a private school through the EdChoice or Cleveland Scholarship Program.
