

Intro

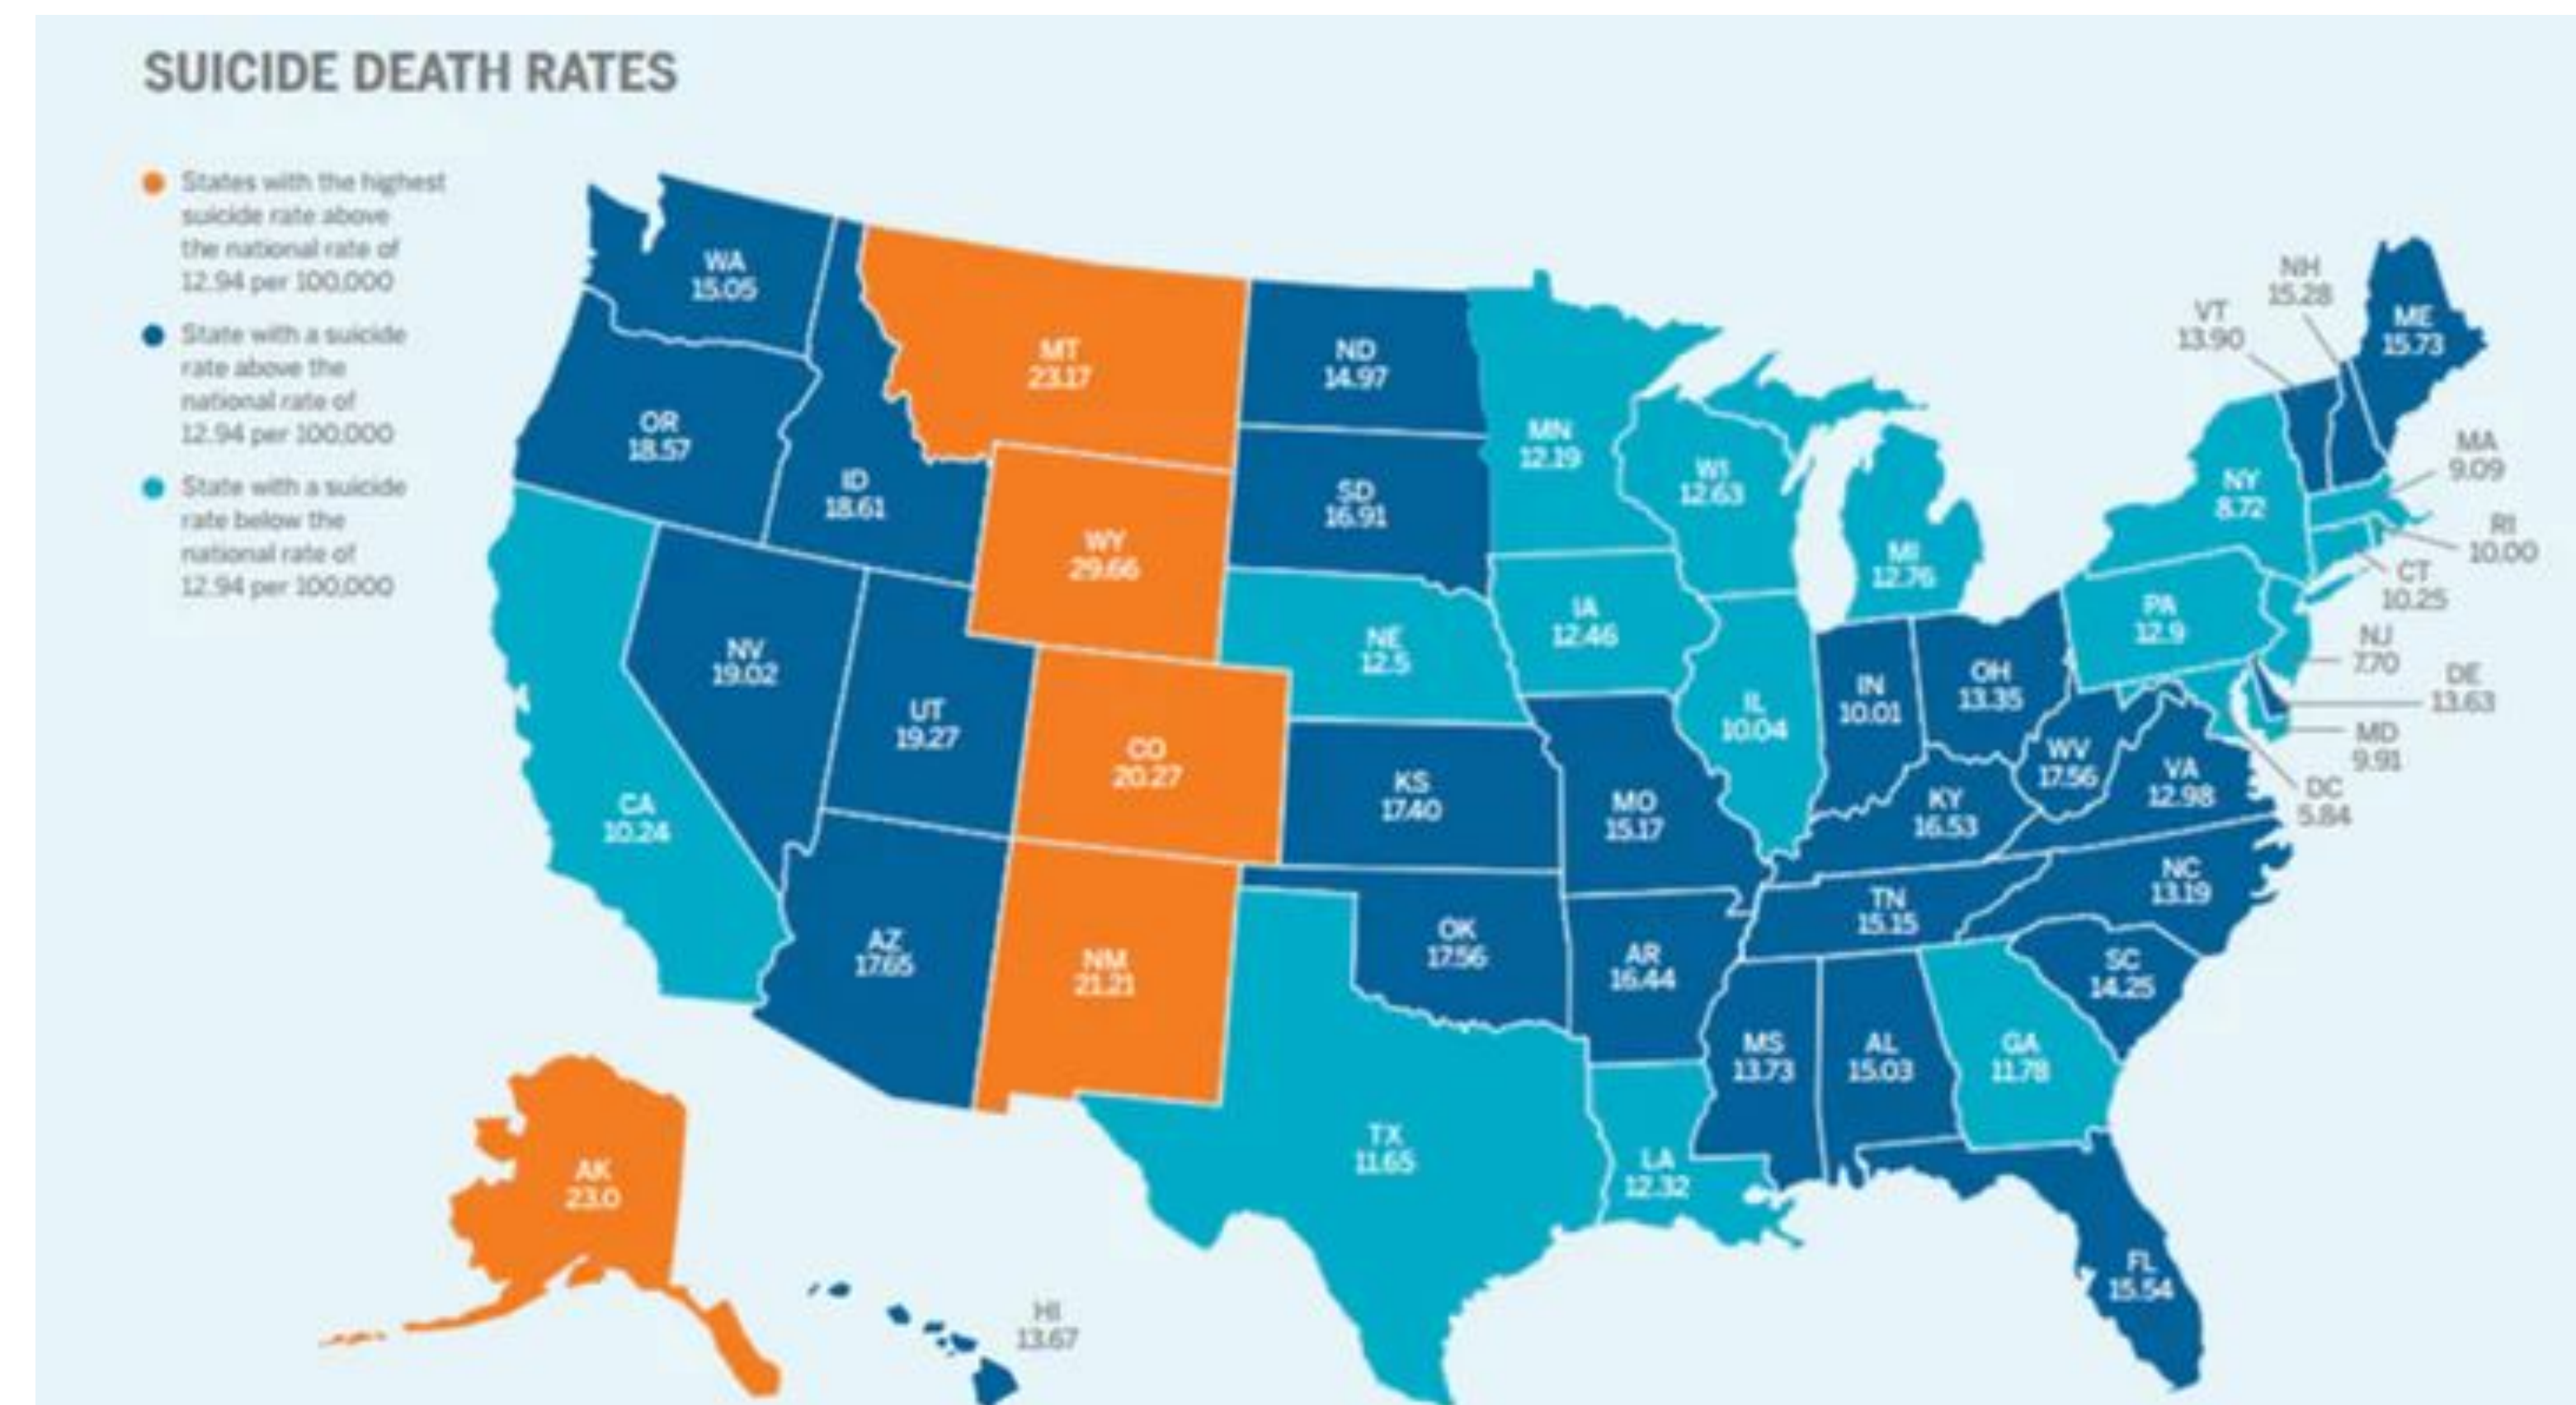

Our society today is made up of too much bullying. Bully victims are between 2 to 9 times more likely to consider suicide than non-victims, according to studies by Yale University. As a teenager in high school I am worried about bullying and suicidal thoughts caused by bullying.

Observation

For my observation I observed 2 suicidal helpline websites. in my observation is covered if the website was appealing, the number of resources there were for someone who thinks about suicide to contact. I also rated these websites on a 1-5 scale with 1 being not so appealing and 5 reaching the needs.

Recommendations

Based of the findings in my research to resolve this problem of too much bullying in the society I would put a support group together in the community to help teens know that they are not alone in this and that someone is there to help them with every aspect of this.

Facts

- Each day in our nation, there are an average of over 3,470 attempts by young people grades 9-12.
- Suicide is the **SECOND** leading cause of death for ages 10-24.

Survey

In my survey, I asked many students at Campus International High School did they ever think about committing suicide and also what would they do if they knew someone who thought about committing suicide. Most of the high schoolers answered with the response of telling someone if they knew someone who had suicidal thoughts.
