

What's for lunch?

Akia Harris, Amon Komora, Dade Fuller, David Barrios, Gabe Vega, Ismail Abdullahi, Syre'yon White

Introduction

Our project looked at high school lunch in CMSD schools. Focusing on who enjoyed the lunch and some recommendations on what students would want to see in future lunches. This poster includes the survey data that was gathered from our school cafeteria.

Research Question

How many Cleveland Metro School District high school students eat and enjoy school lunch?

Recommendations

From our findings we found out that some of our students want to make lots of changes in their lunch. These are some of the options they gave out:

- less pizza
- more fresh foods and vegetables
- Food that isn't rotten
- unburnt food
- less processed food

Observation

Things that we observed: the food we get for school lunch, how many people eat the school lunch and how many really liked the school lunch. We saw multiple people eat 2 or more items and empty their trays into the trash because they felt like the lunch was not pleasing.

Survey

The purpose of our survey was to see how many CMSD students eat and enjoy the school lunch. We asked the students questions that included: How long have you eaten the school lunch that is provided by the school? And Do you believe that there should be something changed about your school lunch?

Facts

These are some facts that we got from the Data Analysis:

- 91% of students of the students agree that there should be more hot meals serve as hot lunch
- More than half, 57% of the students surveyed
- In an interview, "... the kitchen should prepare the vegetables better because they come out soggy."
