

Investigating Homeless Women In Northeast Ohio And Internationally.

Jayla Young

Intro

My project is based on finding out information on the homeless women and the low income women around the Northeast Ohio area. I was only focused on finding out why they became homeless.

Observation

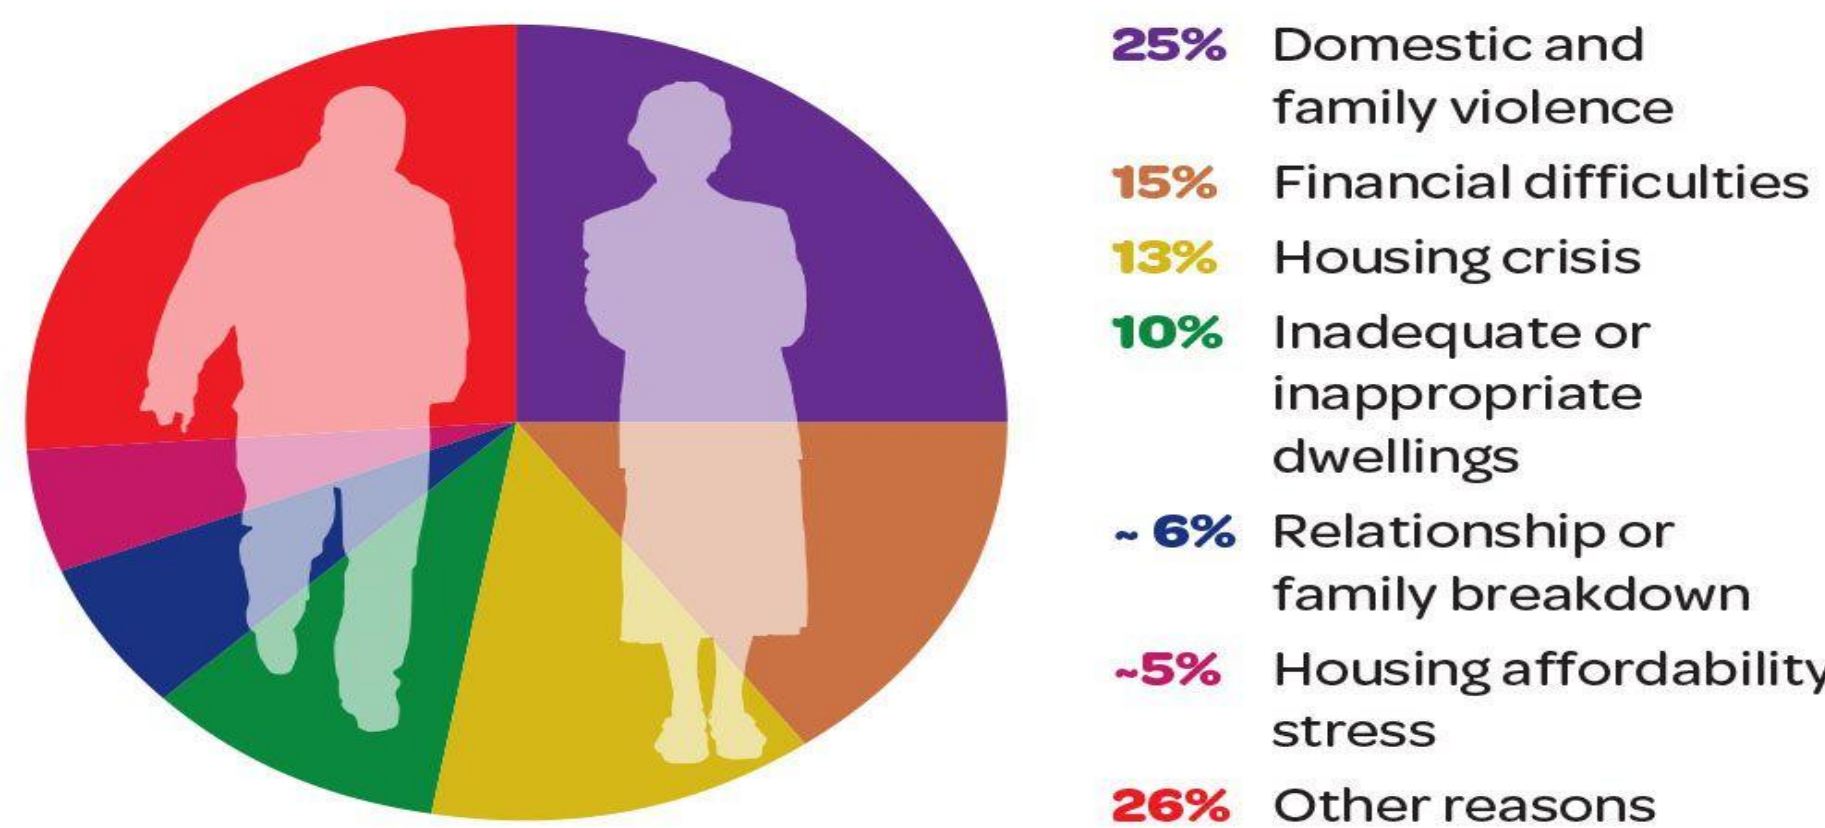

For my project i wanted to find out the causes and effects of homeless women who became homeless, i tried to focus on the Northeast Ohio women overall, but i thought it'd be better if i just focused on women internationally

Recommendations

For this sort of project, i recommend getting closer to what your really aiming for because if not, then the project won't exactly go as planned. Like, ideally my plan was to get the surveys created two weeks before going to the shelters, so i know exactly where to go afterwards. Also to know what your goal is because i knew exactly what my goal was, my goal was to get as much as information as possible even if i dont get the information from the place that i planned to get it from.

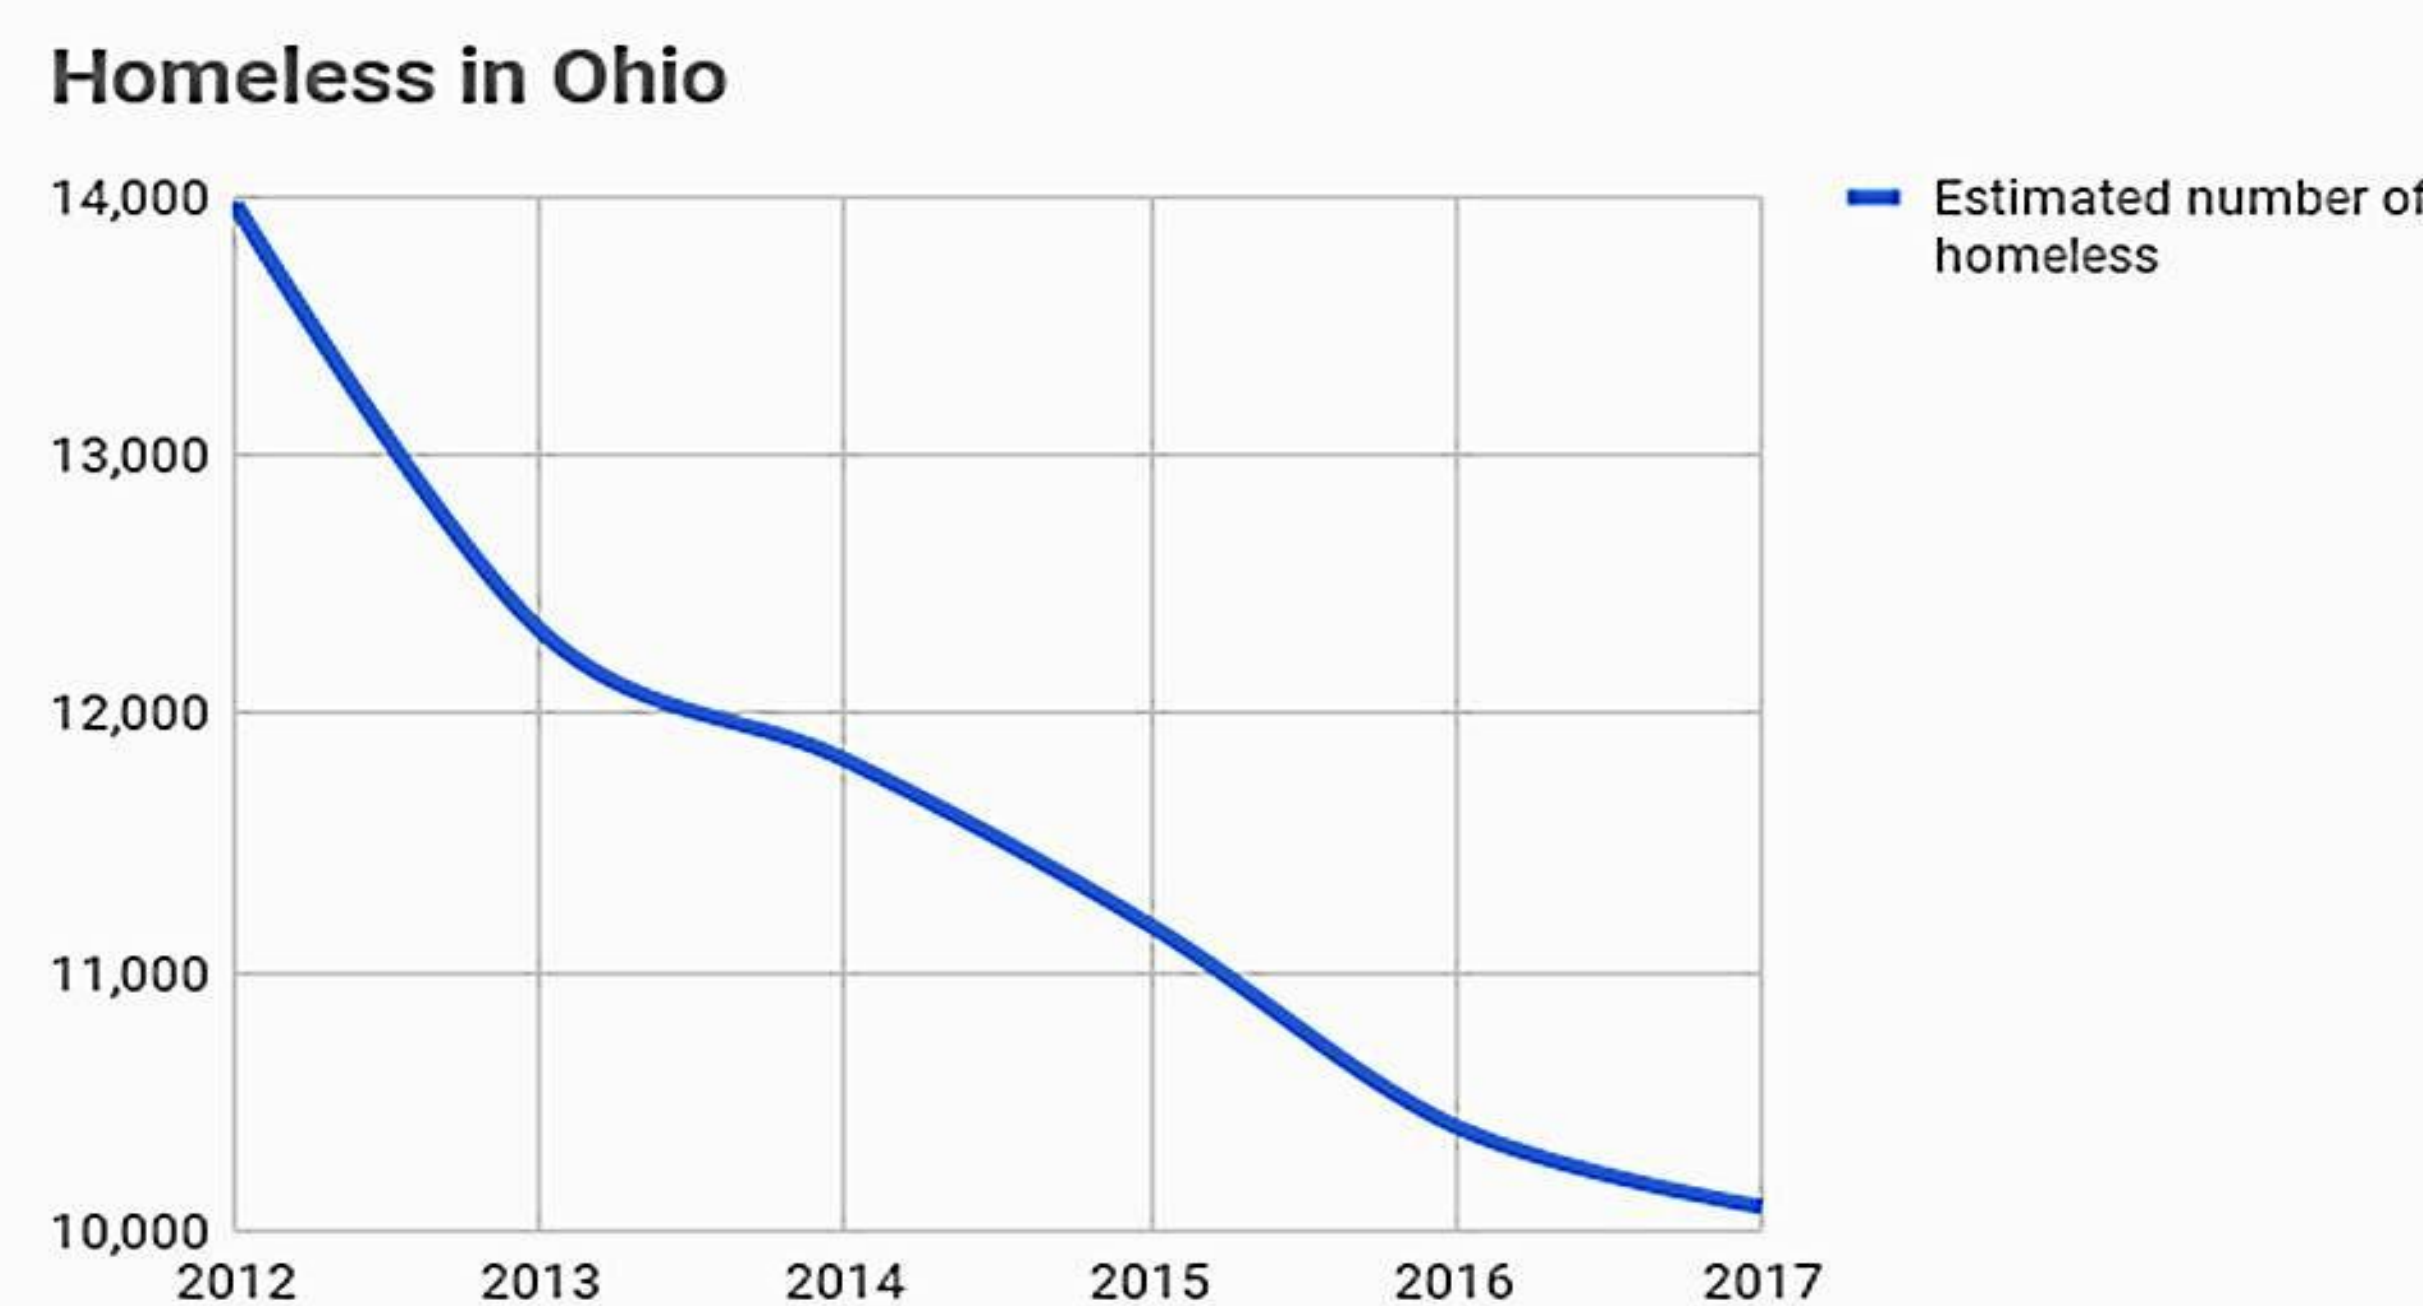

Why are they homeless?

From polling of people seeking support from specialist homeless services:

Facts

In the cuyahoga county black women are at 52.20% of homelessness, white women are at 33.90% then theres latino at 8.90% and lastly there's asians at 2.50%.
